these theoretical questions through an ethnography of those individuals for whom food is central to their self foodies It examines what foodies do and why they do it through an in depth study of their lived experiences The book uncovers how food offers a means of shaping the self not as a consumer but as an amateur who engages in both the production and consumption of material culture and adopts a professional approach which reveals the new moralities of productive leisure in self formation The chapters examine a variety of practices from fine dining and shopping to cooking and blogging and include rare data on how people use media such as cookbooks food television and digital food media in their everyday life This book is ideal for students scholars and anyone interested in the meaning of food in modern life *Business Review Weekly*, 2007
