Manual of Brazilian Portuguese Linguistics Johannes Kabatek, Albert Wall, 2022-10-24 This manual is the first comprehensive account of Brazilian Portuguese linguistics written in English offering not only linguists but also historians and social scientists new insights gained from the intensive research carried out over the last decades on the linguistic reality of this vast territory In the 20 overview chapters internationally renowned experts give detailed yet concise

information on a wide range of language internal as well as external synchronic and diachronic topics. Most of this information is the fruit of large scale language documentation and description projects such as the project on the linguistic norm of educated speakers NURC, the project Grammar of spoken Portuguese and the project Towards a History of Brazilian Portuguese PHPB among others. Further chapters of high contemporary interest and relevance include the study of linguistic policies and psycholinguistics. The manual offers theoretical insights of general interest not least since many chapters present the linguistic data in the light of a combination of formal functional generative and sociolinguistic approaches. This rather unique feature of the volume is achieved by the double authorship of some of the relevant chapters thus bringing together and synthesizing different perspectives.

Manual of Galician Linguistics Xulio Sousa, Ernesto González Seoane, 2024-11-04

The *Manual of Galician Linguistics* provides a comprehensive and accessible overview of the current situation of the Galician language and introduces its readers to the most important topics of current linguistic research on Galician. The volume includes chapters covering diachronic and synchronic descriptions of all main areas of language structure: phonetics, phonology, morphology, syntax and lexicology, as well as chapters on social and regional variation, language contact, sociolinguistics, language variation and other interesting areas of linguistic research. Rich in descriptive details and grounded in modern linguistic theory, this manual will be an essential research tool for students and researchers who are interested in the Galician language and in Romance linguistics. The preparation of this work has been partially funded through grants from the Ministerio de Cultura of the Government of Spain to the Instituto da Lingua Galega and from the Consellería de Cultura, Educación e Universidade of the Xunta de Galicia to the research group Filoloxía e Lingüística Galega of the Universidade de Santiago de Compostela. Manual of Standardization in the Romance Languages Franz Lebsanft, Felix Tacke, 2020-01-20

Language standardization is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric in the Prague School, in the linguistic theory of Eugenio Coseriu, in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian, Italian, French, Catalan, Spanish and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of the minor Romance languages as well as Creoles.
