*Remote Sensing Handbook - Three Volume Set* Prasad Thenkabail, 2018-10-03 A volume in the three volume Remote Sensing Handbook series Remote Sensing of Water Resources

Disasters and Urban Studies documents the scientific and methodological advances that have taken place during the last 50 years. The other two volumes in the series are Remotely Sensed Data Characterization Classification and Accuracies and Land Reso. The Routledge Handbook of Geospatial Technologies and Society Alexander J. Kent, Doug Specht, 2023-08-17. The Routledge Handbook of Geospatial Technologies and Society provides a relevant and comprehensive reference point for research and practice in this dynamic field. It offers detailed explanations of geospatial technologies and provides critical reviews and appraisals of their application in society within international and multi-disciplinary contexts as agents of change. The ability of geospatial data to transform knowledge in contemporary and future societies forms an important theme running throughout the entire volume. Contributors reflect on the changing role of geospatial technologies in society and highlight new applications that represent transformative directions in society and point towards new horizons. Furthermore, they encourage dialogue across disciplines to bring new theoretical perspectives on geospatial technologies from neurology to heritage studies. The international contributions from leading scholars and influential practitioners that constitute the Handbook provide a wealth of critical examples of these technologies as agents of change in societies around the globe. The book will appeal to advanced undergraduates and practitioners interested or engaged in their application worldwide.

*Remote Sensing Handbook, Volume II* Prasad S. Thenkabail, 2024-11-29. Volume II of the Six Volume Remote Sensing Handbook Second Edition is focused on digital image processing including image classification methods in land cover and land use. It discusses object based segmentation and pixel based image processing algorithms, change detection techniques and image classification for a wide array of applications including land use, land cover, croplands, urban studies, processing hyperspectral remote sensing data, thermal imagery, light detection and ranging (LiDAR), geoprocessing workflows, frontiers of GIScience and future pathways. This thoroughly revised and updated volume draws on the expertise of a diverse array of leading international authorities in remote sensing and provides an essential resource for researchers at all levels interested in using remote sensing. It integrates discussions of remote sensing principles, data methods, development, applications and scientific and social context. Features: Provides the most up to date comprehensive coverage of digital image processing. Highlights object based image analysis (OBIA) and pixel based classification methods and techniques of digital image processing. Demonstrates practical examples of image processing for a myriad of applications such as land use, land cover, croplands and urban. Establishes image processing using different types of remote sensing data that includes multispectral, radar, LiDAR, thermal and hyperspectral. Highlights change detection, geoprocessing and GIScience. This volume is an excellent resource for the entire remote sensing and GIS community. Academics, researchers, undergraduate and graduate students as well as practitioners, decision makers and policymakers will benefit from the expertise of the professionals featured in this book and their extensive knowledge of new and emerging trends. *GOOGLE EARTH NARAYAN CHANDER*, 2024-10-16.
