

3.3	Steven is a medical student. He is doing research on the usefulness of calculating a persons' body mass index. Doctors check your body size by measuring your weight and height. This calculation is known as your body mass index (BMI). Research has shown that people within a "Normal" range of body size tend to live the longest and enjoy the best health. One should however remember that your BMI is only one guide to your overall health. The scale below is used to classify the individual's weight status: <table border="1" data-bbox="593 331 1338 445"> <tr> <th>BMI</th><th>CLASSIFICATION</th></tr> <tr> <td>Below 18.4</td><td>Underweight</td></tr> <tr> <td>18.5 – 24.9</td><td>Normal weight</td></tr> <tr> <td>25.0 – 29.9</td><td>Over-weight</td></tr> <tr> <td>30.0 and above</td><td>Obese</td></tr> </table> The table below gives the height (in meters), weight (in kilograms) and the BMI of 10 well known celebrities: <table border="1" data-bbox="403 531 1528 858"> <tr> <th>Name</th><th>Height in metres</th><th>Weight in kg</th><th>BMI (kg/m²)</th></tr> <tr> <td>Kate Moss</td><td>1.70</td><td>48</td><td>17</td></tr> <tr> <td>Gwyneth Paltrow</td><td>1.75</td><td>51</td><td>17</td></tr> <tr> <td>Victoria Beckham</td><td>1.67</td><td>48</td><td>17</td></tr> <tr> <td>Britney Spears</td><td>1.65</td><td>48</td><td>18</td></tr> <tr> <td>Angelina Jolie</td><td>1.70</td><td>54</td><td>19</td></tr> <tr> <td>Jennifer Lopez</td><td>1.67</td><td>54</td><td>19</td></tr> <tr> <td>Kate Winslet</td><td>1.73</td><td>59</td><td>20</td></tr> <tr> <td>Tyra Banks</td><td>1.78</td><td>73</td><td>23</td></tr> <tr> <td>Antonio Banderas</td><td>1.83</td><td>78</td><td>23</td></tr> <tr> <td>Arnold Schwarzenegger</td><td>1.88</td><td>117</td><td>33</td></tr> </table> Use the information given above and answer the following questions. Inhaltsangabe Introduction In Germany education matters lie within the scope of each of the 16 German federal states Consequently there is no unique educational system which is valid for the entire Federal Republic of Germany but 16 individual ones However a German wide basic framework including regulations about the compulsory school attendance for instance does exist The duration of compulsory schooling until passing the Abitur at the Gymnasium however is not regulated by this framework but belongs to the power of decision of each federal state For instance in Thuringia and Saxony the duration of compulsory schooling at the Gymnasium has been limited to eight years as it was already the case before the reunification of Germany in 1990 In the other federal states like North Rhine Westphalia for example the duration of compulsory schooling at the Gymnasium included an additional ninth year resulting in the fact that the students attended the Gymnasium from grade 5 until grade 13 Nevertheless in 2001 the ministry of education of the federal state Saarland decided for a reduction of the duration of compulsory schooling at the Gymnasium by one year By now all the other federal states have followed and therefore also made the decision for a reduced duration of only eight years at the Gymnasium After many heated discussions also the North Rhine Westphalian ministry of education decided for a reduction of the duration of compulsory schooling at the Gymnasium As a consequence of this decision students of two grades G8 and G9 students entered the upper secondary level at all North Rhine Westphalian Gymnasien on August 31st 2010 Ministerium f r Schule und Weiterbildung des Landes Nordrhein Westfalen n d a The students of this so called Doppeljahrgang will all graduate in 2013 and therefore all of them will have to pass the same Abitur exams Hence it must be guaranteed that G8 students have

the same preconditions as G9 students despite having one year less of general schooling before graduating Since no students have entered the upper secondary level after only five years at the Gymnasium in North Rhine Westphalia before 2010 empirical research in this area is hardly available by now Nevertheless this Doppeljahrgang offers the unique chance of directly comparing G8 and G9 students in order to find out in how far the new G8 system was implemented successfully or not Especially in the context of learning *The Armed Forces Covenant in action?* Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 35 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
