contribute to efficient business operations *Built to Let Go: The Proven System to Design Businesses That Sell, Scale, and Set You Free* Rosalind Everhart, 2025-09-09 Too many entrepreneurs build businesses that trap them instead of freeing them. They hustle endlessly only to realize their company can't run without them, making it nearly impossible to sell, franchise, or exit profitably. The truth is, if you don't plan your endgame from the start, you risk creating a job instead of a real asset. *Built to Let Go* is your step-by-step guide to building with the exit in mind. You'll discover how to structure your business so it thrives without your daily involvement, implement systems that buyers and investors value, and explore different exit paths from selling and franchising to automating for long-term passive income. This isn't about abandoning your company; it's about building smarter so you can enjoy freedom, wealth, and choice on your own terms. Whether your goal is to sell one day or simply step back from the grind, this book equips you with the mindset and strategies to create a business that works for you.

Beyond Fintech: Technology Applications For The Islamic Economy Hazik Mohamed, 2020-11-25 *Beyond Fintech: Technology Applications for the Islamic Economy* is a follow-up to the first ever Islamic Fintech book by the author, published in 2018, that provided linkages between Islamic Finance and disruptive technologies like the blockchain. In the wake of fintech as a new trend in financial markets, the ground-breaking book stressed the relevance of Islamic finance and its implications when enabled by fintech towards the development of the Islamic digital economy. While the earlier work discussed the crucial innovation, structural, and institutional development for financial technologies in Islamic Finance, this new research explores the multiple applications possible in the various sectors of the economy, within and beyond finance, that can be significantly transformed. These revolutionary applications involve the integration of AI, blockchain, data analytics, and Internet of Things (IoT) devices for a holistic solution to tackle the bottlenecks and other issues in existing processes of traditional systems. The principles of accountability, duty, justice, and transparency are the foundation of shaping the framework in achieving good governance in all institutions, public or private, Islamic or otherwise. Technologies like AI, blockchain, and IoT devices can operationalize the transparency and accountability that is required to eradicate poverty, distribute wealth, enhance micro, small, and large-scale initiatives for social and economic development, and thus share prosperity for a moral system that enables a more secure and sustainable economy. *Cyber Risk Management in Practice* Carlos Morales, 2025-06-30 *Cyber Risk Management in Practice: A Guide to Real World Solutions* is your companion in the ever-changing landscape of cybersecurity.
