An Efficient Holistic Implementation Plan of the Itil(r) Framework Version 3 for Smb Jochen Hofenstock,2016-03-04 Diploma Thesis from the year 2009 in the subject Computer Science Commercial Information Technology grade 2 Fachhochschule des bfi Wien GmbH Projektmanagement und Informationstechnik language English abstract The IT Infrastructure Library ITIL framework is a defacto standard for a holistic Service Management approach In its third version a five stage lifecycle model provides principles roles processes and functions next to a plurality of information for the history of a service from the cradle to the grave Preceding activities ensure an efficient implementation of ITIL framework for different kinds of management systems used by IT departments or service providers for small and medium sized business SMB This master thesis reviews the corresponding theory of ITIL and organisational change management as well as project management methods necessary for ITIL framework implementation Most small and medium sized businesses rush into the implementation of ITIL framework because an essential analytic planning was not or ineffectually done The dependences and coherences between the Service Strategy Service Design Service Transition Service Operation as well as Continual Service Improvement allege how to efficiently implement the holistic ITIL framework Based on a survey of SMBs experiences and level of organisational maturity this information gets combined and framed in an implementation plan in due consideration of all coherences and dependencies to assure optimum quality of implementation With such a plan SMBs are in a position to generate as much as possible achievement compared with an adequate scale of effort SMB has also the assurance that only the appropriate parts of ITIL framework are affected for its System or Service

Management approach The chain of causation starts with a summary of all five ITIL lifecycle stages and its interfaces next to a survey of SMB s experiences with such a framework and level of organisational maturity It en **An analysis of the success factors in implementing an ITIL-based IT Change and Release Management Application** Jane Jurkscheit,2012-11-27 Master s Thesis from the year 2012 in the subject Computer Science Commercial Information Technology grade 68 von 70 ca 1 3 University of East London course Informatik Wirtschaftsinformatik BWL ITIL language English abstract To ensure the quality of the IT environment for the future the majority of IT managers followed a strategy to introduce an IT change and release management application in the past few years The present thesis researches if the implementations of the given success factors are leading to a successful implementation of a workflow based IT change and release management application and will moreover find further success factors This is done with help of five hypothesises The five hypothesises are based on the HR change management issues on the ITIL reference model and on general process issues The HR change management offers with the eight step model of Kotter critical success factor for changes in the business Publications of Kotter are used to illustrate that the described success factors lead to successful HR change implementation The ITIL reference model defines critical success factors for a successful IT change and release management implementation and are used for a research for the effectiveness of this model The ITIL reference model and process issues publications of the official ITIL source and literature of Laudon Laudon are used for the present thesis In addition other researchers in this field are important mentioned as well Subsequent to that the findings were integrated into the questionnaire and the interviews and used as well get an initial assessment The mixture of the qualitative and quantitative approaches uses the strengths of both methods The given answers strongly depend on the respondent s point of view It becomes clear that a successful implementation of an IT change and release management application comes not only from the implementation of the HR change management issues but also from the implementation of the IT issues The combination of HR and IT issues with their specialised success factors is the best way to gain a successful IT change and release management implementation But the research discovered further improvements and optimisations which mainly deal with redesigned processes The process redesigns based on modification on the ITIL reference model to optimise the IT change process The optimisations include a skip of the formal RfC request form to shorten the whole process chain during the application of an IT change Furthermore an implementation of a key technical employee should be deploy to authorise the IT change instead of an authorisation of the central positioned change manager **Solving of issues with an ITIL framework, which occur during the shakedown phase in a software implementation** Lars Büchner,Mahei Manhai Li,2018-02-07 Seminar paper from the year 2017 in the subject Computer Science Commercial Information Technology grade 2 3 language English abstract This work is adressing major issues which occur during shakedown in a software implementation process *The ITIL Process Manual* James Persse,2016-01-01 This practical guide is a great solution to
