9 marker:

A trade union is a group of employees whose joint purpose is to maintain and improve their conditions of employment. One of the major objective goals of trade unions is to ensure employees are being paid fairly given the demands of the job and market conditions. Trade unions can take several means to achieve higher pay for its members such as going on strike and leading protests against unfair pay, taking legal action against respective regulatory bodies and taking their case to the media for enhanced publicity.

The actions of the trade union would have the impact shown above in the diagram whereby the wage pushed for by the trade union is above the market equilibrium wage of  $w^*$ . In the context of the case study,  $w^*$  would be the minimum wage of £8.21 and  $w_{TU}$  would be £10.75. The power of trade unions in achieving higher wages must not be underestimated and as mentioned in the case study, since 2014, has organised at more than 20 workplaces and won improved contracts, wage rises and sick for employers including the Daily Mail.

15 marker:

Market failure occurs when the allocation of goods and services by the free market is not efficient, leading to a misallocation of resources.

2024-25 TGT/PGT Economics Solved Papers YCT Expert Team , 2024 25 TGT PGT Economics Solved Papers **Carbon Pricing** John Quiggin,David Adamson,Daniel Quiggin,2014-04-25 In 2012 Australia took the major step of introducing a carbon price involving the creation of a system of emissions permits initially issued at a fixed price Carbon Pricing brings together experts instrumental in the development and operation of A Proceedings of the Third International Conference on Computing, Mathematics and Statistics (iCMS2017) Liew-Kee Kor,Abd-Razak Ahmad,Zanariah Idrus,Kamarul Ariffin Mansor,2019-03-27 This book is a product of the Third International Conference on Computing Mathematics and Statistics iCMS2017 to be held in Langkawi in November 2017 It is divided into four sections according to the thrust areas Computer Science Mathematics Statistics and Multidisciplinary Applications All sections sought to confront current issues that society faces today The book brings collectively quantitative as well as qualitative research methods that are also suitable for future research undertakings Researchers in Computer Science Mathematics and Statistics can use this book as a sourcebook to enrich their research works *The International Committee of the Red Cross and its Mandate to Protect and Assist* Christy Shucksmith,2017-08-24 The purpose of this book is to consider the legality of the changing practice of the International Committee of the Red Cross ICRC It provides extensive legal analysis of the ICRC as an organisation legal person and humanitarian actor It draws on the law of organisations International Humanitarian Law International Human Rights Law and other relevant branches of international law in order to critically assess the mandate and practice of the ICRC on the ground The book also draws on more abstract human centric concepts including sovereignty as responsibility and human security in order to assess the development of the concept of humanity for the mandate and practice of the ICRC Critically this book uses semi structured interviews with ICRC delegates to test the theoretical and doctrinal conclusions The book provides a unique insight into the work of the ICRC It also includes a case study of the work of the ICRC in the Democratic Republic of Congo Ultimately the book concludes that the ICRC is no longer restricted to the provision of humanitarian assistance on the battlefield It is increasingly drawn into long term and extremely complicated conflicts in which civilians soldiers and non State actors intermingle In order to remain useful for the people on the ground therefore the ICRC is progressively developing its mandate This book questions whether on occasion this could threaten its promise to remain neutral impartial and independent Finally however it should be said that this author finds that the work of the ICRC is unparalleled on the international stage and its humanitarian mandate is a vital component for those embroiled in the undertaking of and recovery from conflict **Capacity Mechanisms in the EU Energy Market** Leigh Hancher,Adrien de Hauteclouque,Malgorzata Sadowska,2015-09-24 Ensuring an adequate long term energy supply is a paramount concern in Europe EU member states now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidised investments in renewable energy sources

These capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider European regulatory debate. European electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets. If these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the European internal electricity market at risk. This book provides readers with an in depth analysis of capacity mechanisms written by an expert team of policy makers, economists and legal professionals. It will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in Europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition.

Economic Change in Asia M. Bruna Zolin, Bernadette Andreosso-O'Callaghan, Jacques Jaussaud, 2016-08-12. Since the 2008 global economic crisis East Asian economies have faced a number of macroeconomic issues including China's new growth model, the middle income trap in developing East Asian countries and the growing natural fibre market and its socio economic implications. This book addresses these key topical issues which East Asian economies are facing today. Written by international experts in the area of Asian economics and business, it presents the most recent macroeconomic outlook in the region and then goes on to analyse a number of business corporations and industry related cases focussing on the theme of firms strategies. Examining the links between environmental and financial performance, corporate social responsibility and the transfer of environmental management financial accounting standards, the relationship between corporate sustainability activities and corporate profit and the different cultural approaches towards business ethics, this book provides both practical strategies and new theoretical insights. As such, it will appeal to students, scholars and practitioners interested in Asian business and economics.

Law and Corporate Behaviour Christopher Hodges, 2015-10-22. This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence, economic rational acting, responsive regulation and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models: private enforcement of law through litigation in the USA, public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory, the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services, civil aviation, pharmaceuticals and workplace health safety. Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance. Systems in which reporting is essential for safety only function with a no blame culture. The book concludes by proposing an holistic model for maximising compliance within large

organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional's International Arbitration online service *Adaptive Governance of Disaster* Margot A. Hurlbert, 2017-08-07 This book provides a comparative analysis of policy instruments designed to respond to climate change drought and floods in connection with agricultural producers and their communities in four case study areas Alberta and Saskatchewan Canada Coquimbo Chile and Mendoza Argentina Assessed from the standpoint of effectiveness and adaptive governance instruments for improving the livelihood capitals of agricultural producers are identified and recommendations to improve the suite of policy instruments are put forward **All That Is Solid** Danny Dorling, 2014-02-19 Housing was at the heart of the financial collapse and our economy is now precariously reliant on the housing market In this groundbreaking new book Danny Dorling argues that housing is the defining issue of our times Tracing how we got to our current crisis and how housing has come to reflect class and wealth in Britain All That Is Solid radically shows that the solution to our problems rising homelessness a generation priced out of home ownership is not as is widely assumed building more homes Inequality he argues is what we really need to overcome **A-CSEAR**

South Africa UK and the USA *Land, Assets, and Livelihoods* Savath, Vivien, Flutschner, Diana, Peterman, Amber, Santos, Florence, Using data collected from the evaluation of two government land titling interventions in the Indian state of Odisha this paper examines key relationships linking land and livelihood strategies The investigation is one of the first to explicitly use the Gender Agriculture and Assets Project framework to gain additional insights on how gender asset dynamics relate to household livelihood strategies Environment, Energy and Applied Technology Wen-Pei Sung, Jimmy C.M. Kao, 2015-01-29 This proceedings volume brings together selected peer reviewed papers presented at the 2014 International Conference on Frontier of Energy and Environment Engineering Topics covered include energy efficiency and energy management energy exploration and exploitation power generation technologies water pollution and protection air pollution and Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India's problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates **Our Energy Future** Don E. Albrecht, 2014-07-25 Rapid changes in energy production and consumption are having major socioeconomic implications for the communities of rural America Technological developments in horizontal drilling hydraulic fracturing fracking nuclear energy biofuels wind and solar energy have significantly increased domestic energy production and the production of energy from renewable sources has encouraged energy efficiency Yet severe concerns persist and policy decisions on energy issues will have profound implications for all Americans and rural communities where consequences are experienced most directly Thus the time is appropriate for a careful exploration of the socioeconomic implications of our energy future The purpose of this book is to present timely and scientifically sound information on energy policy socioeconomic aspects of energy production and consumption with a focus on rural areas The

book presents the latest research by top scholars with the goal of clarifying options and providing the basis for informed policy decisions

*The UK Regional-National Economic Problem* Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

An "Algorithmic Links with Probabilities" Concordance for Trademarks For Disaggregated Analysis of Trademark and Economic Data World Intellectual Property Organization, Travis J. Lybbert, Nikolas Zolas, Prantik Bhattacharyya, 2014 The authors propose an Algorithmic Links with Probabilities ALP approach to match Trademarks TMs data to economic data and enable these data to speak to each other Specifically they construct a NICE Class Level concordance that maps TM data into trade and industry categories forward and backward This concordance allows researchers to analyze differences in TM usage across both economic and TM sectors In this paper the authors apply this ALP concordance for TMs to characterize patterns in TM applications across countries industries income levels and more They also use the concordance to investigate some of the key determinants of international technology transfer by comparing bilateral TM applications and bilateral patent applications

**Does Regulation Kill Jobs?** Cary Coglianese, Adam M. Finkel, Christopher Carrigan, 2014-01-06 As millions of Americans struggle to find work in the wake of the Great Recession politicians from both parties look to regulation in search of an economic cure Some claim that burdensome regulations undermine private sector competitiveness and job growth while others argue that tough new regulations actually create jobs at the same time that they provide other benefits Does Regulation Kill Jobs reveals the complex reality of regulation that supports neither partisan view Leading legal scholars economists political scientists and policy analysts show that individual regulations can at times induce employment shifts across firms sectors and regions but

regulation overall is neither a prime job killer nor a key job creator The challenge for policymakers is to look carefully at individual regulatory proposals to discern any job shifting they may cause and then to make regulatory decisions sensitive to anticipated employment effects Drawing on their analyses contributors recommend methods for obtaining better estimates of job impacts when evaluating regulatory costs and benefits They also assess possible ways of reforming regulatory institutions and processes to take better account of employment effects in policy decision making Does Regulation Kills Jobs tackles what has become a heated partisan issue with exactly the kind of careful analysis policymakers need in order to make better policy decisions providing insights that will benefit both politicians and citizens who seek economic growth as well as the protection of public health and safety financial security environmental sustainability and other civic goals Contributors Matthew D Adler Joseph E Aldy Christopher Carrigan Cary Coglianese E Donald Elliott Rolf F re Ann Ferris Adam M Finkel Wayne B Gray Shawna Grosskopf Michael A Livermore Brian F Mannix Jonathan S Masur Al McGartland Richard Morgenstern Carl A Pasurka Jr William A Pizer Eric A Posner Lisa A Robinson Jason A Schwartz Ronald J Shadbegian Stuart Shapiro

**Imposing Standards** Martin Hearson, 2021-06-15 In Imposing Standards Martin Hearson shifts the focus of political rhetoric regarding international tax rules from tax havens and the Global North to the damaging impact of this regime on the Global South Even when not exploited by tax dodgers international tax standards place severe limits on the ability of developing countries to tax businesses denying the Global South access to much needed revenue The international rules that allow tax avoidance by multinational corporations have dominated political debate about international tax in the United States and Europe especially since the global financial crisis of 2007 2008 Hearson asks how developing countries willingly gave up their right to tax foreign companies charting their assimilation into an OECD led regime from the days of early independence to the present day Based on interviews with treaty negotiators policymakers and lobbyists as well as observation at intergovernmental meetings archival research and fieldwork in Africa and Asia Imposing Standards shows that capacity constraints and imperfect negotiation strategies in developing countries were exploited by capital exporting states shielding multinationals from taxation and depriving nations in the Global South of revenue they both need and deserve Thanks to generous funding from the Gates Foundation the ebook editions of this book are available as Open Access volumes from Cornell Open [cornellpress.cornell.edu/cornell-open](http://cornellpress.cornell.edu/cornell-open) and other repositories
