Jxta Programmers Guide:

Practical JXTA II Jérôme Verstrynge, Jérôme Verstrynge, 2010-07-19 Practical JXTA II is a revision of the first edition containing new and updated examples covering the latest delivered features This book is an introduction to JXTA JXSE and P2P A new chapter about NAT traversal has been added

Mastering JXTA Joseph D. Gradecki, 2002-10-15 A comprehensive code intensive guide to building commercial quality peer to peer applications with JXTA and Java Tens of millions of people use peer to peer P2P applications such as KaZaA AOL Instant Messenger and Distributed net These applications harness the idle CPU cycles of their host computers to produce enormous databases of information build powerful processing engines and enable communication and file sharing among users around the world Previously P2P applications have been built using proprietary technologies and protocols forcing developers to start from scratch each time they write a new application Now JXTA an open source P2P development technology enables developers to build P2P applications using Java XML and other industry standards With this invaluable book Joseph Gradecki provides a practical guide to building peer to peer applications using Java He provides detailed descriptions of the JXTA technologies and demonstrates how to build real world applications This book also includes Detailed descriptions of the JXTA specification and the Java reference implementation The complete P2P development process including how to build reusable application frameworks Fully functional example applications including a distributed computational engine that can utilize the idle CPU power of thousands of remote machines to solve complex problems and a fault tolerant encrypted network storage system The companion Web site includes All the code listings and complete applications from the book Links to additional JXTA and P2P resources

From P2P and Grids to Services on the Web Ian J. Taylor, Andrew Harrison, 2008-12-11 Covers a comprehensive range of P2P and Grid technologies Provides a broad overview of the P2P field and how it relates to other technologies such as Grid Computing jini Agent based computing and web services

Distributed Applications and Interoperable Systems René Meier, Sotirios Terzis, 2008-05-27 This volume contains the proceedings of DAIS 2008 the 8th IFIP International Conference on Distributed Applications and Interoperable Systems The conference was held in Oslo Norway during June 4-6 2008 as part of the DisCoTec Distributed Object Techniques federated conference in conjunction with the 10th International Conference on Coordination Models and Languages COORDINATION and the 10th IFIP International Conference on Formal Methods for Open Object Based Distributed Systems FMOODS The conference was sponsored by IFIP International Federation for Information Processing and was organized by the IFIP Working Group 6.1 Distributed applications and interoperable systems have become an integral part of everyday living and hence part of the socio-economic ecosystem of our human environment

With such pervasive distribution of software systems across a multitude of heterogeneous environments and user domains distributed applications must support seamless provision of services as well as service evolution and adaptability to ensure long-term sustainability This support must go beyond the provision of individual services in isolation towards systems in which such services can interoperate and be integrated into the everyday environment catering for the changing needs of their users
