Handbook of Research on the Impact of Culture and Society on the Entertainment Industry Ozturk, R. Gulay, 2014-06-30 This reference provides a review of the academic and popular literature on the relationship between communications and media studies cinema advertising public relations religion food tourism art sports technology culture marketing and entertainment practices Provided by publisher [Collaborative Learning Through Computer Conferencing](#)

Anthony R. Kaye, 2012-12-06 The idea for the Workshop on which this book is based arose from discussions which we had when we both attended an earlier and more broadly based NATO Advanced Research Workshop on Computer Supported Collaborative Learning directed by Claire O Malley in Maratea Italy in 1989 We both felt that it would be interesting to organise a second Workshop in this area but specifically concerned with the use of computers and networking telematics as communication tools for collaborative learning outside the formal school setting We were particularly interested in examining the ways in which computer conferencing can be used for collaboration and group learning in the contexts of distance education adult learning professional training and organisational networking And we wanted to ensure that we included in the scope of the Workshop situations in which learning is a primary explicit goal e g an online training programme as well as situations where learning occurs as a secondary even incidental outcome of a collaborative activity whose explicit purpose might be different e g the activities of networked product teams or task groups Another goal was to try to bring together for a few days people with three different perspectives on the use of computer conferencing users researchers and software designers We hoped that if we could assemble a group of people from these three different constituencies we might collectively be able to make a small contribution to real progress in the field *Handbook of Research on Positive Scholarship for Global K-20 Education* Wang, Viktor, 2018-03-02 In the twenty first century learning and the definition of education is changing New digital online and social tools have the ability to transform the classroom and engage learners like never before In the midst of this technological revolution it is crucial for educators and administrators to be able to gauge the impact of digital tools on learners in a variety of settings The Handbook of Research on Positive Scholarship for Global K 20 Education is a critical scholarly resource that examines the collaboration of education and technology within disciplinary fields Featuring coverage on a broad range of topics such as experiential education improvisational learning and andragogy this publication is geared towards academicians practitioners and researchers seeking current research on all areas of education and e learning *The Power of Rankings in Economics and Research Organizations* Stephan Pühringer, Jens Maesse, Thierry Rossier, 2025-06-06 Discourses around research excellence and quality are predominant within the economic sciences with various forms of ranking playing a central role They make excellence in research and teaching visible but they also create hierarchical orders between researchers institutions publication outlets and countries The authors of this volume analyse the role of rankings in shaping and transforming economics from different theoretical methodological and

disciplinary perspectives The various contributions explore the specific situation in different countries as well as global developments within economics and beyond In addition the book contributes to an overall debate about the role and function of rankings in academia The analysis focuses on four aspects rankings and social hierarchies rankings and paradigmatic hegemonies rankings and regulations policies as well as rankings and critique alternatives The book addresses scholars in economic sociology economics higher education and science studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Reshaping the University David Palfreyman, Ted Tapper, 2014-06-12 The global economic crisis has required governments across the globe to reconsider their spending priorities It is within this demanding economic context that higher education systems have been steadily restructured with in many ways the English model in the vanguard of change This book focuses in particular upon the policy of removing almost entirely public support for the payment of student fees This has emerged from a steady process of change which has broad political support and is underwritten by the idea that higher education is now seen more as a private than a public good As this shift has occurred not a new innovation but rather a return to what once prevailed as more of a market in English higher education so the relationship between government and the higher education has evolved with the latter now attempting to steer the development of the system through a state regulated market The book has a strong comparative dimension that draws upon US higher education to illustrate both the possible advantages and potential hazards to the marketization strategy It concludes that any such strategy needs to be accompanied by state regulation if it is to function effectively particularly to stimulate price competition encourage innovation from new entrants and provide consumer protection for students paying high fees

The European Defence Agency Nikolaos Karampekios, Iraklis Oikonomou, 2015-04-10 This volume provides a comprehensive understanding of the European Defence Agency EDA the leading EU armaments policy institution Despite its critical role in European strategic and military affairs as the key hub of European policy making in the field of armaments the Agency has hitherto received very little attention by the academic and research community around Europe To fill this gap in the literature the book covers a multitude of inter related themes and topics Not only does it provide a detailed analysis and assessment of the Agency's record as the first institution dealing solely with EU armaments policy but it also links these findings to international relations and European integration theory Thematically the contributions go beyond the mere description of achievements gaps and risks elaborating on novel themes such as space offsets pooling and sharing and transatlantic armaments relations The book combines an interdisciplinary approach to the study of European defence with theoretical and ontological pluralism and seeks to unveil the strategic industrial institutional and ideational sources of armaments collaboration and capability development under the aegis of the EDA The multi faceted orientation of the book will be of much interest to students of European security EU institutions

Macrohistory and Globalization Grinin, Leonid, 2012-06-01 The present monograph considers some macrohistorical trends along with the aspects of globalization Macrohistory is history on the large scale that tells the story of the entire world or of some major dimensions of historical process For the present study three aspects of macrohistory have been chosen These are technological and political aspects as well as the one of historical personality Taken together they give a definite picture of unfolding historical process which is described from the beginning of human society formation to the present day and near future The combination in the monograph title of the two terms macrohistory and globalization is in no way artificial On the contrary the connection of these terms is organic at least as the real goal of macrohistory is to find meaning in the past so as to create new possibilities of meaning for the future The analysis of globalization also includes three aspects political economic and futurological as today the world may well be regarded as being at the start of a new global reconfiguration The author presents his ideas of the world prospective political and in some respects social economic development basing on the analysis of macrohistory and contemporary globalization processes The monograph also considers some global scenarios of the World System's near future

Out of Print George Brock, 2013-09-03 News and journalism are in the midst of upheaval shifts such as declining print subscriptions and rising website visitor numbers are forcing assumptions and practices to be rethought from first principles. The internet is not simply allowing faster wider distribution of material; digital technology is demanding transformative change. Out of Print analyzes the role and influence of newspapers in the digital age and explains how current theory and practice have to change to fully exploit developing opportunities. In Out of Print, George Brock guides readers through the history, present state, and future of journalism, highlighting how and why journalism needs to be rethought on a global scale and remade to meet the demands and opportunities of new conditions. He provides a unique examination of every key issue from the phone hacking scandal and Leveson Inquiry to the impact of social media on news and expectations. He presents an incisive, authoritative analysis of the role and influence of journalism in the digital age. Online supporting resources for this book include downloadable lecture slides.

Future Cultures Scott Smith, Susan Cox-Smith, 2023-10-03 It's hard to know what specific opportunities, technologies, or challenges the future will bring. If you want to overcome the uncertainties of tomorrow, it's essential that you build a future culture.
