Automating with SIMATIC S7-300 inside TIA Portal Hans Berger, 2014-09-19 SIMATIC S7 300 has been specially designed for innovative system solutions in the manufacturing industry and with a diverse range of controllers it offers the optimal solution for applications in centralized and distributed configurations. Alongside standard automation safety technology and motion control can also be integrated. The TIA Portal user interface is tuned to intuitive operation and encompasses all the requirements of automation within its range of functions from configuring the controller through programming in the different languages all the way to the program test and simulation. For beginners engineering is easy to learn and for professionals it is fast and efficient. This book describes the configuration of devices and network for the S7 300 components inside the new engineering framework TIA Portal. With STEP 7 Professional V12 configuring and programming of all SIMATIC controllers will be possible in a simple and efficient way. In addition to various technology functions the block library also contains a PID control. As reader of the book you learn how a control program is formulated and tested with the programming languages LAD, FBD, STL and SCL. Descriptions of configuring the distributed I/O with PROFIBUS DP and PROFINET IO using SIMATIC S7 300 and exchanging data via Industrial Ethernet round out the book. PC Mag, 1991-03-26 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Automating with SIMATIC S7-400 inside TIA Portal Hans Berger, 2014-06-30 This book presents a comprehensive description of the configuration of devices and network for the S7 400 components inside the engineering framework TIA Portal. You learn how to formulate and test a control program with the programming languages LAD, FBD, STL and SCL. The book is rounded off by configuring the distributed I/O with PROFIBUS DP and PROFINET IO using SIMATIC S7 400 and data exchange via Industrial Ethernet. SIMATIC is the globally established automation system for implementing industrial controllers for machines, production plants and processes. SIMATIC S7 400 is the most powerful automation system within SIMATIC. This process controller is ideal for data intensive tasks that are especially typical for the process industry. With superb communication capability and integrated interfaces it is optimized for larger tasks such as the coordination of entire systems. Open loop and closed loop control tasks are formulated with the STEP 7 Professional V11 engineering software in the field proven programming languages Ladder Diagram, LAD, Function Block Diagram, FBD, Statement List, STL and Structured Control Language, SCL. The TIA Portal user interface is tuned to intuitive operation and encompasses all the requirements of automation within its range of functions from configuring the controller through programming in the different languages all the way to the program test. Users of STEP 7 Professional V12 will easily get along with the

descriptions based on the V11 With start of V12 the screens of the technology functions might differ slightly from the V11
