Martha The Passenger Pigeon:

Martha the Passenger Pigeon Adrienne Kleinschmidt, 2014-12-11 Martha the Passenger Pigeon is a book about the last Passenger Pigeon This is the story of these wonderful birds and how they changed history When mankind discovered the pigeons could carry important messages on their backs during wartime they secured their places in history These birds not only had an illustrious past but it appears might have a future as well There are those in the scientific community who wish to bring them back In the name of science great The controversy surrounding this project is this Millions of dollars to bring back a species who had it s time and now should be released back into The Universe Come on My goal here is to save those who still exist those who will soon be gone too Specifically The Monarch Butterfly which is slated for extinction very soon Like now Their existence is going to depend wholly on us the people doing something Something which is important easy affordable and a wonderful bonding experience with your family The research I did for my book Bella The Butterfly was significant It opened my eyes to the catastrophe which is occurring right under our noses It is so controversial that it bears description It is this The government hired Monsanto to develop a poison to kill The Milkweed Plants Why So there would be more room for corn for the production of more ethanol no Milkweed Plants The Milkweed Plant is the only plant the Butterfly will lay her eggs on When the babies hatch they eat the leaves and spin their cocoons When they turn into Butterflies they leave with the poison in the Milkweed Plant s leaves to protect them from predators I know it s a huge God Thing And we re losing it This Spring 2015 will be instrumental in saving these wondrous beauties of Nature We must all plant Milkweed Seeds to save them all If we don t they may not be here for more than a few more years Is it really this crucial a situation for the Butterflies YES They used to inhabit 45 acres of land in their migratory landing in The Sierra Mountains Now it is less than 2 Yes this is an emergency of the highest degree I am partnering with Live Monarch com to help spread the word I am offering their Milkweed Seeds for free in my book Bella The Butterfly You can purchase these books and others on my website <http://saveourbutterflies.com> Find out all the information about The Monarch Butterflies there Please help save these beautiful beings This is the real topic on the table my friends At least for now These plants will come up every year and have the most amazing neon pink orange and yellow flowers So spend your money on bringing back the pigeon or saving the Butterflies You decide Choose Wisely Grasshopper

Message from Martha Mark Avery, 2014-07-17 The story of Passenger Pigeon and what we can learn from its demise 100 years ago September 1st 2014 marked the centenary of one of the best documented extinctions in history the demise of the Passenger Pigeon From being the commonest bird on the planet 50 years earlier the species became extinct on that fateful day with the death in Cincinnati Zoo of Martha the last of her kind This book tells the tale of the Passenger Pigeon and of Martha and of author Mark Avery's journey in search of them It looks at how the species was a cornerstone of the now much diminished ecology of the eastern United States and how the species went from a population that numbered in the billions to nil in a terrifyingly brief period of time It also explores the largely untold story of the ecological annihilation of this part of America in the latter half of the 19th century a time that saw an unprecedented loss of natural beauty and richness as forests were felled and the prairies were ploughed with wildlife slaughtered more or less indiscriminately Despite the underlying theme of loss this book is more than another depressing tale of human greed and ecological stupidity It contains an underlying message that we need to reforge our relationship with the natural world on which we depend and plan a more sustainable future Otherwise more species will go the way of the Passenger Pigeon We should listen to the message from Martha

The Passenger Pigeon Errol Fuller, 2014-09-15 A haunting beautifully illustrated memorial to this iconic extinct bird At the start of the nineteenth century Passenger Pigeons were perhaps the most abundant birds on the planet numbering literally in the billions The flocks were so large and so dense that they blackened the skies even blotting out the sun for days at a stretch Yet by the end of the century the most common bird in North America had vanished from the wild In 1914 the last known representative of her species Martha died in a cage at the Cincinnati Zoo This stunningly illustrated book tells the astonishing story of North America's Passenger Pigeon a bird species that like the Tyrannosaur the Mammoth and the Dodo has become one of the great icons of extinction Errol Fuller describes how these fast agile and handsomely plumaged birds were immortalized by the ornithologist and painter John James Audubon and captured the imagination of writers such as James Fenimore Cooper Henry David Thoreau and Mark Twain He shows how widespread deforestation the demand for cheap and plentiful pigeon meat and the indiscriminate killing of Passenger Pigeons for sport led to their catastrophic decline Fuller provides an evocative memorial to a bird species that was once so important to the ecology of North America and reminds us of just how fragile the natural world can be Published in the centennial year of Martha's death The Passenger Pigeon features rare archival images as well as haunting photos of live birds

Vietnam each entry pairs the fascinating history surrounding each object with the story of its creation or discovery and the place it has come to occupy in our national memory Kurin sheds remarkable new light on objects we think we know well from Lincoln's hat to Dorothy's ruby slippers and Julia Child's kitchen including the often astonishing tales of how each made its way into the collections of the Smithsonian Other objects will be eye opening new discoveries for many but no less evocative of the most poignant and important moments of the American experience Some objects such as Harriet Tubman's hymnal Sitting Bull's ledger Cesar Chavez's union jacket and the Enola Gay bomber tell difficult stories from the nation's history and inspire controversies when exhibited at the Smithsonian Others from George Washington's sword to the space shuttle Discovery celebrate the richness and vitality of the American spirit In Kurin's hands each object comes to vivid life providing a tactile connection to American history Beautifully designed and illustrated with color photographs throughout The Smithsonian's History of America in 101 Objects is a rich and fascinating journey through America's collective memory and a beautiful object in its own right

Mendel's Ark Amy Lynn Fletcher, 2014-09-19 Does extinction have to be forever As the global extinction crisis accelerates conservationists and policy makers increasingly use advanced biotechnologies such as reproductive cloning polymerase chain reaction PCR and bioinformatics in the urgent effort to save species Mendel's Ark considers the ethical cultural and social implications of using these tools for wildlife conservation Drawing upon sources ranging from science to science fiction it focuses on the stories we tell about extinction and the meanings we ascribe to nature and technology The use of biotechnology in conservation is redrawing the boundaries between animals and machines nature and artifacts and life and death The new rhetoric and practice of de extinction will thus have significant repercussions for wilderness and for society The degree to which we engage collectively with both the prosaic and the fantastic aspects of biotechnological conservation will shape the boundaries and ethics of our desire to restore lost worlds

Mourning in the Anthropocene Joshua Trey Barnett, 2022-08-01 Enormous ecological losses and profound planetary transformations mean that ours is a time to grieve beyond the human Yet Joshua Trey Barnett argues in this eloquent and urgent book our capacity to grieve for more than human others is neither natural nor inevitable Weaving together personal narratives theoretical meditations and insightful readings of cultural artifacts he suggests that ecological grief is best understood as a rhetorical achievement As a collection of worldmaking practices rhetoric makes things matter bestows value directs attention generates knowledge and foment feelings By dwelling on three rhetorical practices naming archiving and making visible Barnett shows how they prepare us to grieve past present and future ecological losses Simultaneously diagnostic and prescriptive this book reveals rhetorical practices that set our ecological grief into motion and illuminates pathways to more connected caring earthly coexistence

Last of the Giants Jeff Campbell, 2019-08-01 Today an ancient world is vanishing right before our eyes the age of giant animals Over 40 000 years ago the earth was ruled by megafauna mammoths mastodons saber toothed tigers and giant sloths Of course those creatures no longer exist and there is only one likely reason for that the evolution and arrival of the earth's only tool wielding hunter the wildly adaptive comparatively pint sized human species Many more of the world's biggest and baddest creatures including the black rhino the dodo giant tortoises and the great auk have vanished since our world became truly global Last of the Giants chronicles those giant animals and apex predators pushed to extinction in the modern era The book also highlights those giant species that remain even though many barely survive living in such low numbers that they are on the brink of leaving this world within the next few decades However there is hope for many endangered species can still be saved As it profiles each extinct and endangered animal Last of the Giants focuses on the conservation efforts that are trying to preserve the world's remaining charismatic species before they are lost forever

Lost Animals, Disappearing Worlds Barbara Allen, 2025-06-12 A moving and motivating collection of portraits of extinct species revealing the profound implications of their disappearance This book presents thirty one extinct species through personal portraits The intimate approach not only highlights each particular species but also explores the broader implications of losing a species forever How do we honor such a loss Can we grieve for species we never knew These animals range from the well known passenger pigeon thylacine and great auk to lesser known creatures like the Arabian ostrich Saint Helena earwig and Bramble Cay melomys Through her poignant portraits Barbara Allen not only tugs on the heartstrings but also aims to inspire readers to protect vulnerable and endangered species today motivating us to play a positive role in conserving our planet's biodiversity
