Vol 1 No 2 **Effectiveness of Online Marketing Campaigns** Sebastian Klapdor, 2013-02-19. Internet advertising has come of age, yet little is known in research and practice about how digital channel advertising really works. The empirical research in this thesis intends to fill this gap and shed light on the effectiveness of online advertising. Two studies are conducted that focus on multichannel online advertising and search engine advertising, the single most important online ad channel. In an interdisciplinary approach, both studies first develop comprehensive theoretical models based on existing work in related research fields, for example, marketing and information retrieval. This approach pays off and leads to new and insightful findings. There are synergies in multichannel online advertising: purchase propensity increases when consumers receive advertising messages through multiple channels. The channel order can influence the conversion probability. Click-through rates in search engine advertising are influenced through various keyword criteria on semantic and syntactic level.

The results of this thesis constitute an important starting point for future research in online advertising Furthermore the results enable practitioners to improve the effectiveness of online advertising through a more differentiated campaign management approach Based on its findings the thesis outlines how a future integrated approach to online advertising could look like *New Trends in Software Methodologies, Tools and Techniques* Hamido Fujita,Vladimír Mařík,2009 Papers presented at the Eighth International Conference on New Trends in Software Methodologies Tools and Techniques SoMeT 09 held in Prague Czech Republic from September 23rd to 25th 2009 P v **Advances in Information Technology Research and Application: 2011 Edition** ,2012-01-09 Advances in Information Technology Research and Application 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Information Technology The editors have built Advances in Information Technology Research and Application 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Information Technology in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Advances in Information Technology Research and Application 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>
