  - a. "The role of the nurse is to administer medications and other treatments prescribed by your doctor."
  - b. "In addition to caring for you while you are sick, the nurses will help you plan to maintain your health."
  - c. "The nurse's job is to help the doctor by collecting information and communicating any problems that occur."
  - d. "Nurses perform many of the same procedures as the doctor, but nurses are with the patients for a longer time than the doctor."

Clinical judgment based on the nurse's clinical experience is part of EBP, but clinical decision making should also incorporate current research and research-based guidelines. Evaluation of patient outcomes is important, but data analysis is not required to use EBP. All published articles do not provide research evidence; interventions should be based on credible research, preferably randomized controlled studies with a large number of subjects.
