staff have become very complacent regarding proper coding However Medicare and third party insurers will soon begin to deny claims which are not coded correctly which in turn will cost physician groups time and money This book focuses on Worker s Compensation and Personal Injury a very large segment of the healthcare industry and is a new area to ICD 10 The diagnosis coding for injuries is much different than for Medicare or group insurance and unless the physicians and their staff learn how to use it properly they risk losing income for themselves and worse they risk losing the case for the patient
