The Heavy Economic Toll of Gender-based Violence: Evidence from Sub-Saharan Africa Rasmane Ouedraogo, Mr. David Stenzel, 2021-11-19 The COVID 19 pandemic and lockdowns have led to a rise in gender based violence In this paper we explore the economic consequences of violence against women in sub Saharan Africa using large demographic and health survey data collected pre pandemic Relying on a two stage least square method to address endogeneity we find that an increase in the share of women subject to violence by 1 percentage point can reduce economic activities as proxied by nightlights by up to 8 percent This economic cost results from a significant drop in female employment Our results also show that violence against women is more detrimental to economic development in countries without protective laws against domestic violence in natural resource rich countries in countries where women are deprived of decision making power and during economic downturns Beyond the moral imperative the findings highlight the importance of combating violence against women from an economic standpoint particularly by reinforcing laws against domestic violence and strengthening women s decision making power

Gender-Based Violence and Femicide in South Africa Tameshnie Deane, 2024-06-27 This book presents new perspectives on gender based violence GBV in South Africa It argues that violence against women is a manifestation of unequal gender relations and harmful manifestations of hegemonic masculinity which are governed by patriarchal beliefs institutions and systems It includes chapters on quantitative research that assess not only the levels and determinants of violence against women but also men s attitudes towards gender based violence perceptions of violence the legislative frameworks governing violence against women in South Africa and the current cases and jurisprudence relating to this scourge In spite of its focus on South Africa the book also provides insights for comparative scholars exploring the value of different constitutional articulations of human rights and how they support or fail to support efforts to combat violence against women By assessing recent incidents and responses to gender based violence the book provides a view of not only the societal but also jurisprudential opportunities and pitfalls in this area that may be applicable elsewhere Gender equality and central to this the right of women to live lives free of violence is a precondition for full democratic participation and is a

universal goal Accordingly the South African experience contributes to a wider understanding of the possibilities and limitations of societal and legal reform in challenging the ubiquity of violence against women The book is aimed at researchers practitioners students professionals and advocates in the field of gender based violence **Applying**

Anthropology to Gender-Based Violence Hillary J. Haldane, Jennifer R. Wies, 2015-08-20 Applying Anthropology to Gender Based Violence Global Responses Local Practices addresses the gaps in theory methods and practices that are currently used to engage the problem of gender based violence This book complements the work carried out in the legal human services and health fields by demonstrating how a focus on local issues and responses can better inform a collaborative global response to the problem of gender based violence With chapters covering Africa Asia Latin and North America and Oceania the volume illustrates the various ways scholars practitioners frontline workers and policy makers can work together to end violence in their local communities The chapters in this volume provide ample evidence that top down responses to violence have been inadequate and that solutions are available when the local historical political and social context is taken into consideration Applying Anthropology to Gender Based Violence contains useful insights that when combined with the efforts of other disciplines offer solutions to the problem of gender based violence
