

Guide to Formal Essay Writing

This guide to essay writing has been created by teachers of Frederickton High School to help you research, write, reference, and format your essay. Each section contains a list of helpful links that will assist you with essay writing. These links have been tried and approved by FHS teachers.

At the end of this guide are three links to sample essays, formatted to match the three styles of writing that are used at FHS.

I. BEGINNING YOUR PAPER - Topic Selection and Research

- (a) **Topic Selection:** Your topic should be something you are interested in within the confines of the course you are taking and at the instructor's discretion.
- (b) **Research:** Read as much as you can about your topic. Find as many academic sources about your topic as possible. Books are best; however, academic websites work, too (these are primarily .edu sites).
- (c) Once you understand your topic, **create a "why" or "how" question** that will generate discussion or argument.
- (d) **Thesis Statement:** Formulate a thesis statement that begins to answer the question you have about your topic. This should include an argument and several reasons to help prove your argument.
- (e) **Format:** Establish the format for your paper. This may be dependent upon the class or discipline for which you are writing your paper. Common formats include APA style, Chicago-manual style, or MLA style.

Human Resource Management Ronald R. Sims,2007-01-01 The contributors in this book identify and clearly discuss contemporary and critical issues challenges and opportunities in HRM The book attempts to achieve the delicate balance between basic HRM functions and the new world of HRM Moreover in a dynamic field like HRM a complete look at contemporary HRM issues challenges and opportunities is a must for today s and tomorrow s students and future managers and leaders After all it is important for any book to undertake a current state of the field while also bridging the gap of traditional HRM activities i e issues challenges and opportunities and the possible future

state of the HRM field An organizing principle for this book is the need to for an integrated HRM system comprised of multiple activities designed to influence organizational and employee behaviors The books contributors include some basic theories and models that simultaneously consider how HRM activities like recruitment selection reward practices and development activities among others are being impacted by contemporary issues challenges and opportunities for the field of HRM particularly HRM functions and professional as they are increasingly expected to play a role in enabling organizational managers and other employees to achieve desired organizational results Thus the essence of the book is that the collective chapters reflect both a functional orientation built on theory and models but also provide insights into how to translate theory into practice via the establishment of the increasingly critical role HRM procedures practices and processes play in accomplishing the goals and objectives in contemporary organizations

Macro cognition: The Science and Engineering of Sociotechnical Work Systems Paul Ward,Robert R. Hoffman,Gareth E. Conway,Jan Maarten Schraagen,David Peebles,Robert J. B. Hutton,Erich J. Petushek,2018-02-28 The increasing complexity of work systems and changes in the nature of workplace technology over the past century have resulted in an exponential shift in the nature of work activities from physical labor to cognitive work Modern work systems have many characteristics that make them cognitively complex They can be highly interactive comprised of multiple agents and artifacts information may be limited and distributed across space and time task goals are frequently ill defined conflicting dynamic and emergent planning may only be possible at general levels of abstraction or require adaptive solutions some degree of proficiency or expertise is required the stakes are often high and uncertainty time constraints and stress are seldom absent To complicate matters further cognition in complex work settings is typically constrained by broader professional organizational and institutional practice and policy These features of cognitive work present significant challenges to scientific methodology and theory and subsequent design of reliable interventions Historically philosophers and scientists have attempted to understand the mental activities experienced during cognitive work at multiple levels of analysis using divergent methods Some have examined cognition at an associative contextual functional or holistic level relying on naturalistic methods to understand the higher mental processes as they work in harmony during goal directed behavior Others have embraced experimental methods and favored internal over external validity often reducing cognition to a psychology of fundamental acts such as short term memory access with millisecond shifts in attention More recently Macro cognition has evolved as a complementary paradigm Macro cognitive researchers have studied the cognitive functions and processes associated with skilled adaptive collaborative and resilient cognitive work in the context of the aforementioned complexities of psychotechnical and sociotechnical work systems Typically this research has been carried out using cognitive task analytic techniques that draw on both naturalistic and quasi experimental methods The primary goals of research in Macro cognition are to better understand cognitive adaptations to complexity to increase our theoretical understanding of the organism environment relations by studying the mapping between cognitive work and real
