**Xhosa and Russian Folktales** Bertie Neethling, 2019-07-23 The purpose of this publication is to indicate that Xhosa iintsomi folktales are structured in such a way that many links or commonalities emerge when a comparison between tales is made Orally transmitted literary forms had to endure much prejudice and were often not considered worthy of study However in many different cultures all over the world the concept of oral literature and its functioning still exists There are various forms of oral literature but one of the best known is the folktale Folklorist and formalist Vladimir Propp 1895 1970 aimed to describe the story structure of Russian folktales according to a linear sequence of the acts of the characters Using

one hundred folktales he illustrated how the storylines of these tales are remarkably similar identical actions are often performed only by different characters The somewhat surprising and obvious links between Propp s material and Xhosa iintsomi prompted the choice of Propp s model as the departure point for this comparative study Forty five Xhosa folktales were chosen because of their literary quality and suitability to Propp s methodology as a tool to organise the Xhosa data on the grounds of structural features that characterise this genre

decolonization The book explores the derogatory descriptions that have been used to describe ATR and argues that subjecting religion to logical inquiry diminishes the essence of worship and promotes disbelief The book examines the relevance of indigenous African tradition to cultural reconstruction and evaluates the place of African culture in the global context The author argues that upholding the general principle of African Traditional belief which upholds communalism and morality can address problems such as corruption poverty and unemployment in the African continent This book is an essential resource for academics students researchers and anyone interested in understanding the relevance of African Traditional Religion in contemporary times and the need for cultural reconstruction and mind decolonization for the betterment of the African continent and the world at large Livelihood and Landscape Change in Africa: Future Trajectories for Improved Well-Being under a Changing Climate Sheona Shackleton, Paul Hebinck, Chinwe Ifejika Speranza, Vanessa Masterson, Dian Spear, Maria Tengö, 2019-10-08 This book is based on a Special Issue of the journal LAND that draws together a collection of 11 diverse articles at the nexus of climate change landscapes and livelihoods in rural Africa all explore the links between livelihood and landscape change including shifts in farming practices and natural resource use and management The articles which are all place based case studies across nine African countries cover three not necessarily mutually exclusive thematic areas namely smallholder farming livelihoods under new climate risk five articles long term dynamics of livelihoods and landscape change and future trajectories two articles and natural resource management and governance under a changing climate spanning forests woodlands and rangelands four articles The commonalities key messages and research gaps across the 11 articles are presented in a synthesis article All the case studies pointed to the need for an integrated and in depth understanding of the multiple drivers of landscape and livelihood change and how these interact with local histories knowledge systems cultures complexities and lived realities Moreover where there are interventions such as new governance systems REDD or climate smart agriculture it is critical to interrogate what is required to ensure a fair and equitable distribution of emerging benefits **Paradise Lost**, 2022-06-13 Paradise Lost Race and Racism in Post apartheid South Africa is about the continuing salience of race and persistence of racism in post apartheid South Africa The chapters in the volume illustrate the multiple ways in which race and racism are manifested and propose various strategies to confront racial inequality racism and the power structure that underpins it while exploring how through a renewed commitment to a non racial society apartheid racial categories can be put under erasure at exactly the time they are being reinforced **Higher Education in the BRICS Countries** Simon Schwartzman, Rómulo Pinheiro, Pundy Pillay, 2015-03-24 In spite of the increasing attention attributed to the rise in prominence of the BRICS Brazil Russia India China and South Africa countries few studies have looked at the ways in which broader social expectations with respect to the role of higher education across the BRICS have changed or not in recent years Our point of departure is that contrary to the conventional wisdom focusing on functionalistic perspectives higher education systems are not just designed

by governments to fulfill certain functions but have a tendency for evolving in a rather unpredictable fashion as a result of the complex interplay between a number of internal and external factors In reality national higher education systems develop and change according to a complex process that encompasses the expectations of governmental agencies markets the aspirations of the population for the benefits of education the specific institutional traditions and cultures of higher education institutions and increasingly so the interests and strategies of the private firms entering and offering services in the higher education market This basically means that it is of outmost importance to move away from conceiving of universities or higher education as single monolithic actors or sector One way of doing this is by investigating a selected number of distinct but nonetheless interrelated factors or drivers which taken together help determine the nature and scope of the social compact between higher education its core actors and institutions and society at large government industry local communities professional associations
