Linear Equations, Inequalities, and Functions Wendy Lawson,Nguyen Nghi H.,2005 Supplemental math textbook for high school students with innovative features shortcuts in solving linear equations and inequalities innovative techniques in solving by number line innovative approaches in solving by graphing using graphing calculators **Functional Equations And Inequalities In Several Variables** Stefan Czerwik,2002-05-14 This book outlines the modern theory of functional equations and inequalities in several variables It consists of three parts The first is devoted to additive and convex functions defined on linear spaces with semilinear topologies In the second part the problems of stability of functional equations in the sense of Ulam Hyers Rassias and in some function spaces are considered In the last part the functional equations in set valued functions are dealt with for the first time in the mathematical literature The book contains many fresh results concerning those problems **An Introduction to the Theory of Functional Equations and Inequalities** Marek Kuczma,2009-03-12 Marek Kuczma was born in 1935 in Katowice Poland and died there in 1991 After finishing high school in his home town he studied at the Jagiellonian University in Krak w He defended his doctoral dissertation under the supervision of Stanislaw Golab In the year of his habilitation in 1963 he obtained a position at the Katowice branch of the Jagiellonian University now University of Silesia Katowice and worked there till his death Besides his several administrative positions and his outstanding teaching activity he accomplished excellent and rich scientific work publishing three monographs and 180 scientific papers He is considered to be the founder of the celebrated Polish school of functional equations and inequalities The second half of the title of this book describes its contents adequately Probably even the most devoted specialist would not have thought that about 300 pages can be written just about the Cauchy equation and on some closely related equations and inequalities And the book is by no means chatty and does not even claim completeness Part I lists the required preliminary knowledge in set and measure theory topology and algebra Part II gives details on solutions of the Cauchy equation and of the Jensen inequality in particular on continuous convex functions Hamel bases on inequalities following from the Jensen inequality Part III deals with related equations and inequalities in particular Pexider Hossz and conditional equations derivations convex functions of higher order subadditive functions and stability theorems It concludes with an excursion into the field of extensions of homomorphisms in general Janos Aczel Mathematical Reviews This book is a real holiday for all the mathematicians independently of their strict speciality One can imagine what deliciousness represents this book for functional equationists B Crstici Zentralblatt f r Mathematik **Systems of Linear Equations and Inequalities** Charles C.
