[et al.], 2024-03-31 It is an honor and privilege to welcome you to the 7th South East Asia Design Research International Conference The conference's theme Improving Professionalism and Reflective Thinking through Design Research invites us to reflect on the current educational challenges e.g. globalization and industrial revolution 4.0 and transform them into opportunities through design research It acknowledges the need to develop our professionalism so that we can proactively contribute to the advancement of educational science and praxis It challenges us to rethinking the design research as a method to make learning and teaching innovation possible but also as a paradigm in building our capacity for innovation Yogyakarta is an artsy and historical city which serves as a fitting cultural social political and economic milieu for the conference The tagline Jogja Istimewa itself shows how the city has special values to be explored and experienced and we encourage you to absorb the city's abundance The Kraton the cultural and political heart of the city Fort Vredeburg museum Malioboro road Dipowisata urban tourism to name a few The perfect ambience of Yogyakarta will provide us with a convenient space to interact and exchange ideas with colleagues as a means of professional learning Our goal is for you to get new ideas tools and materials from the conference which will contribute to your professional development The variety of sessions workshops and social events will give you opportunities to connect with friends and colleagues to expand your networks We are excited about the keynote and invited speakers We believe they will share challenging and innovative ideas about education This conference is the result of the hard work support and dedication of a number of parties We wish to thank all the committee members who together make the conference possible The committee has been working throughout the year to propose sessions review a record number of submissions answer queries arrange the schedule and response to last minute requests We also want to thank Sanata Dharma University Ministry of Research Technology and Higher Education of Indonesia Sogang University and SEAMEO QITEP in Mathematics for their contribution to funding the conference *Course In Mathematics For The Iit-Jee And Other Engineering Entrance Examinations: Trigonometry* Choubey K. R., 2011-09 **Discovering Mathematics with Maple** R.J. Strooker, J.F. Kaashoek, 2012-12-06 his book grew out of the wish to let students of econometrics get acquainted with the powerful techniques of computer algebra at an early stage in their curriculum As no textbook available at the time met our requirements as to content and presentation we had no other choice than to write our own course material The try out on a group of 80 first year students was not without success and after adding some necessary modifications the same material

was presented to a new group of students of similar size the year after. Some more adjustments were made and the final result now lies before you. Working with computer algebra packages like Derive, Mathematica and Maple over many years convinced us of the favourable prospects of computer algebra as a means of improving the student's understanding of the difficult concepts on which mathematical techniques are often based. Moreover, advanced mathematical education, be it for mathematics itself or for mathematical statistics, operations research and other branches of applied mathematics, can greatly profit from the large amount of non-trivial mathematical knowledge that is stored in a computer algebra system. Admittedly, the fact remains that many a tough mathematical problem, such as solving a complicated non-linear system or obtaining a finite expression for a multiple parameter integral, can not easily be handled by computer algebra, either if at all.
