part of almost all sectors and segments related to the educational landscape. Be it teaching, learning or assessment, ICT is shaping the future of education in India. The integration of information and communication into the classroom has changed the way students learn today. Indian teachers are also experimenting with innovative ways of teaching using ICT tools. They use various digital platforms to plan lessons, conduct them in the classrooms or virtually, and also conduct assessments. Educational technology offers effective ways to reach different types of learners and assess their understanding in different ways. The well-equipped preparation of teachers with ICT tools and tools is one of the key factors for the success of technology-based teaching and learning. With the increased access to mobiles, internet connections, and different platforms of education, teachers are becoming more comfortable using technology in their classrooms for teaching and learning process. After the pandemic, learning management system has become a new trend in online classes, collaborative teaching and learning can now take on new forms, and even be monetized. Learning materials are easily shared among students, and questions are answered via e-mail, SMS, and phone calls, and various social media platforms such as WhatsApp and Facebook. Teachers are using different platforms for giving homework to students. The blended teaching learning process is adopted by the university and colleges. These new trends are coming into the educational system of India after the pandemic. *Manual of Sperm Function Testing in Human Assisted Reproduction* Ashok Agarwal, Ralf Henkel, Ahmad Majzoub, 2021-04-15.
