Mobli, Jeffrey C Hoch, 2017-05-18 Providing a definitive reference source on novel methods in NMR acquisition and
processing this book will highlight similarities and differences between emerging approaches and focus on identifying which
methods are best suited for different applications The highly qualified editors have conducted extensive research into the
fundamentals of fast methods of data acquisition in NMR including applications of non Fourier methods of spectrum analysis
With contributions from additional distinguished experts in allied fields clear explanations are provided on methods that
speed up NMR experiments using different ways to manipulate the nuclei in the sample modern methods for estimating the
spectrum from the time domain response recorded during an NMR experiment and finally how the data is sampled Starting
with a historical overview of Fourier Transformation and its role in modern NMR spectroscopy this volume will clarify and
demystify this important emerging field for spectroscopists and analytical chemists in industry and academia
