*Life: A User's Manual* Georges Perec, 2009-07-01 The renowned French author's modern masterpiece one of the great novels of the century on the level of Joyce Proust Mann Kafka and Nabokov Boston Globe Structured around a single moment in time 8 00 p m on June 23 1975 Georges Perec's elaborate jigsaw puzzle of a novel begins in an apartment block in Paris where chapter by chapter room by room a rich cast of characters is revealed in a series of tales that are bizarre unlikely moving funny and sometimes quite ordinary Rolling Stone From the confessions of a racing cyclist to the plans of an avenging murderer from a young ethnographer obsessed with a Sumatran tribe to an eccentric English millionaire who has devised the ultimate pastime *Life A User's Manual* is a symphony of human irony portraying the mixed marriages of fortunes passions and despairs betrayals and bereavements of hundreds of lives in Paris and around the world The apartment block's one hundred rooms are arranged in a magic square and the book as a whole is peppered with a staggering range of literary puzzles and allusions acrostics and problems of chess and logic All are there for the reader to solve Those who have a taste for the unusual for books that create worlds unto themselves will be dazzled by this crazy quilt monument to the imagination The New York Times Book Review **Life, a User's Manual** Georges Perec, 1987 Set in a Paris apartment block this novel describes in minute detail the lives of the inhabitants and the apartments they inhabit at a specific moment in time

Raymond Queneau all sharing in its light hearted slightly boozy bonhomie the convivial antithesis of the fractious volatile coteries of the early twentieth century avant garde For the last fifty years the Oulipo has undertaken the same simple goal to investigate the potential of constraints in the production of literature that is formal procedures such as anagrams acrostics lipograms texts which exclude a certain letter and other strange and complex devices Yet far from being mere parlour games these methods have been frequently used as part of a passionate though sometimes satirical involvement with the major intellectual currents of the mid twentieth century Structuralism psychoanalysis Surrealism analytic philosophy all come under discussion in the group s meetings and all find their way in the group s exercises in ways that while often ironic are also highly informed Using meeting minutes correspondence and other material from the Oulipo archive at the Bibliotheque nationale de France The Oulipo and Modern Thought shows how the group have used constrained writing as means of puckish engagement with the debates of their peers and how as the broader intellectual landscape altered so too would the group s conception of what constrained writing can achieve

*Stranger Than Fiction* Edwin Frank, 2024-11-19 One of the Washington Post s 50 Best Nonfiction Books of 2024 A New York Times Book Review Editors Choice Ambitious intelligent and happily unpretentious Louis Menand The New Yorker Convincing idiosyncratic and often felicitous Alexandra Jabobs The New York Times Book Review A legendary editor s reckoning with the twentieth century novel and the urgent messages it sends How can we live differently a young woman urgently demands in Virginia Woolf s novel *The Waves* It is the 1930s war and death are in the air but her question was asked again and again in the course of a century where things changed fast and changed all the time The century brought world wars revolutions automobiles movies and the internet votes for women death camps The century brought questions Novelists in the twentieth century had a question of their own how can we write a novel as startling and unforeseen as the world we live in Again and again they did transforming the novel as the century remade the world Imagine the history of the twentieth century novel recounted with the urgency and intimacy of a novel That s what Edwin Frank the legendary editor who has run the New York Review Books publishing imprint since its inception does in *Stranger than Fiction* With penetrating insight and originality Frank introduces us to books some famous some little known from the whole course of the century and from around the world Starting with Dostoevsky s *Notes from Underground* of 1864 Frank shows how its

twitchy self undermining and never satisfied narrator established a voice that would echo through the coming century He illuminates the political vision of H G Wells s science fiction Colette and Andre Gide s subversions of traditional gender roles and Gertrude Stein s untethering of the American sentence He describes the monumental ambition of books such as Mrs Dalloway The Magic Mountain and The Man Without Qualities to rebuild a world of human possibility upon the ruins of World War I and explores how Japan s Natsume S seki and Nigeria s Chinua Achebe broke open European models to reflect their own distinct histories and experience Here too are Vasily Grossman Anna Banti and Elsa Morante reckoning in specific ways with the traumas of World War II while later chapters range from Marguerite Yourcenar and V S Naipaul to Gabriel Garcia Marquez and W G Sebald The story as a whole is one of fearless often reckless exploration as well as unfathomable desolation Throughout we discover the power of the novel to reinvent itself to find a way for itself to live differently Stranger than Fiction offers a new vision of the history and art of the novel and of a dark and dazzling time in whose light and shadow we still stand

*The Architecture of Error* Francesca Hughes, 2014-11-07 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline s needs anxieties and desires When architects draw even brick walls to six decimal places with software designed to cut lenses it is clear that the logic that once organized relations between precision and material error in construction has unraveled Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness Meanwhile error and the always political space of its dissent has reconfigured itself In *The Architecture of Error* Francesca Hughes argues that behind the architect s acute fetishization of redundant precision lies a special fear of physical error What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks as by an unspoken horror of loss of control over error material life and everything that matter stands for Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials the proliferation of material testing and the rhetorical obstacles that blighted cybernetics Why is it she asks that the more we cornered physical error the more we feared it Hughes s analysis of redundant precision exposes an architecture of fear whose politics must be called into question Proposing error as a new category for architectural thought Hughes draws on other disciplines and practices that have interrogated precision and failure citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark Barbara Hepworth Rachel Whiteread and others These non architect practitioners she argues show that error need not be excluded and precision can be made accountable

**The Metainterface** Christian Ulrik Andersen, Soren Bro Pold, 2018-04-27 How the interface has moved from the PC into cultural platforms as seen in a series of works of net art software art and electronic literature The computer interface is both omnipresent and invisible at once embedded in everyday objects and characterized by hidden exchanges of information between objects The interface has moved from office into culture with devices apps the cloud and

data streams as new cultural platforms In *The Metainterface* Christian Ulrik Andersen and S ren Bro Pold examine the relationships between art and interfaces tracing the interface s disruption of everyday cultural practices They present a new interface paradigm of cloud services smartphones and data capture and examine how particular art forms including net art software art and electronic literature seek to reflect and explore this paradigm Andersen and Pold argue that despite attempts to make the interface disappear into smooth access and smart interaction it gradually resurfaces there is a metainterface to the displaced interface Art can help us see this the interface can be an important outlet for aesthetic critique Andersen and Pold describe the semantic capitalism of a metainterface industry that captures user behavior the metainterface industry s disruption of everyday urban life changing how the city is read inhabited and organized the ways that the material displacement of the cloud affects the experience of the interface and the potential of designing with an awareness of the language and grammar of interfaces *The Cambridge Introduction to Postmodernism* Brian McHale, 2015-06-26 This Introduction surveys the full spectrum of postmodern culture from architecture and visual art to fiction poetry and drama Real Theatre Paul Rae, 2018-12-27 Theatre is often said to offer unique insights into the nature of reality but this obscures the reality of theatre itself In *Real Theatre* Paul Rae takes a joined up approach to the realities of theatre to explain why performances take the forms they do and what effects they have Drawing on examples ranging from *Phantom of the Opera* and Danny Boyle s *Frankenstein* to the performances of the Wooster Group and arthouse director Tsai Ming liang he shows how apparently discrete theatrical events emerge from dynamic and often unpredictable social technical and institutional assemblages These events then enter a process of cultural circulation that as Rae explains takes many forms fleeting conversations the mercurial careers of theatrical characters and the composite personae of actors and high profile products like the Hollywood movie *Birdman* The result is a real theatre that speaks of and to the idiosyncratic and cumulative experience of every theatre participant Literature and Contingency Christina Lupton, Carsten Meiner, 2020-05-21 This collection features leading literary critics and explores the role of language in thinking about the ways in which the world might be otherwise and the history of contingency as a longstanding literary concept The defining feature of contingency lies in the suggestion that things that have already happened might have been otherwise Central to late twentieth century European critical and sociological thinking that argument is at the centre of this volume The contributors to this volume explore subjects including how literature philosophy and history all cope with contingency the existence of contingency in genres as diverse as enlightenment fables Aristotle Hardy Jane Austen and post war American literature the contingency of old age and the poetics of contingency As the chapters here illustrate our efforts to understand each other involve a constant opening onto being otherwise an enterprise in which the role of the literary critic remains key Of interest to scholars across a range of literary genres this volume would also have applications for philosophy researchers exploring the metaphysics of contingency This book was originally published as a special issue of *Textual Practice* **The Routledge Handbook of**

**Wittgenstein's Novels** Martin Klebes, 2006-07-25 Analyzing features of Wittgenstein's philosophical work and including in depth textual analyses this study investigates the impact of Ludwig Wittgenstein's work on contemporary German and French novelists Drawing upon aesthetics architectural history philosophy of science and photography the book seeks to explain why references both to Wittgenstein as a person as well as to his work are more pervasive than other equally renowned twentieth century philosophers and asks why some authors such as Heidegger and Roubaud are less well known and only partially translated into

Taylor,2006 French novels such as Madame Bovary and The Stranger are staples of high school and college literature courses This work provides coverage of the French novel since its origins in the 16th century with an emphasis on novels most commonly studied in high school and college courses in world literature and in French culture and civilization      *Is That a Fish in Your Ear?* David Bellos,2011-10-11 A New York Times Notable Book for 2011 One of The Economist s 2011 Books of the Year People speak different languages and always have The Ancient Greeks took no notice of anything unless it was said in Greek the Romans made everyone speak Latin and in India people learned their neighbors languages as did many ordinary Europeans in times past Christopher Columbus knew Italian Portuguese and Castilian Spanish as well as the classical languages But today we all use translation to cope with the diversity of languages Without translation there would be no world news not much of a reading list in any subject at college no repair manuals for

cars or planes we wouldn't even be able to put together flat pack furniture. Is That a Fish in Your Ear ranges across the whole of human experience from foreign films to philosophy to show why translation is at the heart of what we do and who we are. Among many other things David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators and if not why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says in our own language or in another? Surprising, witty and written with great joie de vivre, this book is all about how we comprehend other people and shows us how ultimately translation is another name for the human condition.

**Meaning** David E. Cooper, 2014-12-18. Meaning is one of our most central and most ubiquitous concepts. Anything at all may in suitable contexts have meaning ascribed to it. In this wide-ranging book David Cooper departs from the usual focus on linguistic meaning to discuss how works of art, ceremony, social action, bodily gesture and the purpose of life can all be meaningful. He argues that the notion of meaning is best approached by considering what we accept as explanations of meaning in everyday practice and shows that in these situations we are explaining the appropriate fit of an item, whether a word or an artwork, with something larger than or outside of itself. This fuller account of meaning explores questions of the meaning of meaning and tackles issues such as whether meaning is just a misleading folk term for something more basic, whether there really is meaning at all, and whether we should strive for meaning or let our lives just be rather than mean. By taking the problem of meaning out of the technical philosophy of language and providing a more general account, Cooper is able to offer new insights into the import, function and status of meaning that will be of interest not only to philosophers of language but to students and philosophers working in areas such as epistemology and metaphysics.
