Handbook of Digital Technologies in Movement Disorders Roongroj Bhidayasiri,Walter Maetzler,2024-01-20 Over

the past few years there have been fundamental changes in the diagnosing and treating patients with chronic diseases significantly affecting management of neurological movement disorders In addition the health and fitness sector developed several devices to better classify track and potentially treat chronic diseases Both handling and interpreting these large datasets has been revolutionized by machine and deep learning approaches leading to new and more effective therapies resulting in longer survival rates Handbook of Digital Technologies in Movement Disorders aims to unite these factors to provide a comprehensive guide to patient focused treatments for movement disorders This book is divided into five distinct sections starting with an introduction to digital technologies concepts and terminologies The following section reviews various perspectives on technology in movement disorders including patient and medical professionals The third section presents technologies used in detecting measuring progression and determining response to treatments This is followed by reviewing the technology used in various treatments of movement disorders including assistive and robotic technologies Finally the last section examines the challenges with technology including privacy and other ethical issues Reviews different stakeholders perspectives on technology in movement disorders Presents technological advancements for diagnosing monitoring and managing Parkinson s disease Discusses challenges with implementing technology into treatment

Interaction between Automated Vehicles and other Road Users Philipp Wintersberger, Andreas Löcken, Debargha Dey, 2024-09-10 An increasing number of automated vehicles will pervade our traffic systems in the future The absence of a human driver requires these vehicles to communicate to and interact with other traffic participants such as vulnerable road users pedestrians cyclists and emerging mobility forms like eBikes or scooters but potentially also drivers of manual vehicles In this regard various studies and concepts demonstrating so called external Human Machine Interfaces eHMI have been presented in the past couple of years Many of these works have investigated comparably simple scenarios such as a single pedestrian aiming to cross the street when an automated vehicle is approaching Although we still welcome such contributions research in this area will have to take more complex situations into account This drives the need for research addressing other situations involving groups of vulnerable road users and traffic participants different scenarios including roundabouts or urban shared spaces but also exploring the potential of communication and interaction beyond such classical situations to improve cooperation in traffic

Narratives of Qualitative Research Josh Tenenbergh, 2024-05-21 Narratives of Qualitative Research uses a novel form of writing about how to do qualitative research called a praxis narrative Each narrative is told from the author s perspective in carrying out one of his past research studies in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging research studies the points of trouble along with the successes This will be relevant to researchers who have already undertaken one or more

empirical research studies though not necessarily using qualitative approaches and now find themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the reader can follow the author s journey through his research studies as a way to reorient their conception of qualitative research and their own praxis of it This is fascinating reading for qualitative researchers and students taking qualitative research courses across the social sciences education and behavioural sciences

Design Change to Fishery Independent Surveys: When to Adjust and How to Account For It Fabio Campanella,Ben Scoulding, Nathan Bacheler,Kyle Shertzer,2025-03-07 Fishery independent surveys provide crucial information for monitoring and assessing marine fish stocks Their utility can largely be attributed to sampling procedures that are consistent across space and time such that observed dynamics can reasonably be assumed to reflect those of the population or community being studied However sometimes changes to the survey design become desirable or necessary They may be desirable if the benefits of modification outweigh the benefits of consistency for example with improvements in sampling technology or efficiency revised survey priorities or increased funding that allows for greater spatial coverage or temporal resolution In other cases changes to the survey design may not be desirable but necessary for example when specific supplies or equipment become unobtainable or with reductions in funding ship time or human resources
