Gonzalez Briseno,2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to  
enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical  
understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to  
engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding  
of the economic social and political implications of budget policies the stakeholders involved and when and how to provide  
inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget  
literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget  
literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process  
governments simplify and disseminate budget information for demand side actors citizens this information will then be used  
by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets  
to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is  
to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential  
knowledge needed for analyzing their government s fiscal policy objectives and measures and the confidence and sense of  
social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes  
pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for  
the development improvement or scaling up of budget literacy initiatives      **Auditing & Systems** Irvin N. Gleim,William A.
