*The Times Index, January -December 2012* ,2012      **Ethics, Efficiency and Macroeconomics in China** Jonathan Leightner,2017-04-21 This book tells the story of how China's leaders from Mao to Xi have sacrificed ethics to promote either macroeconomic performance or microeconomic efficiency This story includes Mao's collectivization of land the Great Leap Forward the Great Cultural Revolution Deng's opening China to international trade Tiananmen Square the freeing of prices food and medicine scandals the 2015 surge and collapse of the Chinese stock market the falling of China's foreign reserves and so on In 2008 China's leaders correctly identified the best strategy as a consumption driven growth strategy because the current world is suffering from a glut of savings However for that strategy to work the Chinese need to be able to trust China's economy and leaders In the absence of trust people will make decisions based on extremely short time frames which will hurt China's long run potential and continue to generate a series of speculative bubbles In the absence of trust wealthy Chinese will continue to move their assets abroad putting tremendous downward pressure on the Chinese yuan The Chinese will develop a long run perspective and invest in China only when they can trust China's future In today's world trust is necessary Trust is built on ethics
