Jacob Mincer Shoshana Grossbard, 2006-06-26 BY SHOSHANA GROSSBARD In 2004 the Society of Labor Economists announced its first Award for Lifetime Achievement in Labor Economics Jacob Mincer and Gary Becker were the recipients The award was then renamed the Jacob Mincer Award Two years earlier Mincer was the first to win the IZA Award in Labor Economics These awards recognize Mincer's primary role in shaping labor economics but they only hint at the breadth of his reputation and accomplishments he is a member of the National Academy of Sciences and has been appointed a Fellow of the American Statistical Association and the Econometric Society as well as a distinguished Fellow of the American Economic Association Mincer is one of the principal architects of Modern Labor Economics MLE a premier application of micro economics in the spirit of Chicago's positive economics There are typically three steps to such application 1 a theoretical model is developed or borrowed leading to testable implications 2 empirical work is performed and 3 the findings are analyzed in light of the theoretical analysis All of Mincer's work has followed those steps even when this was a rare occurrence When he started in the mid 1950s labor economics was a subfield of institutional economics Labor economics is now a major field of economics As a result of his work and that of other pioneers MLE became an example for other applications of economic models

Guyana John Gafar, 2003 The purpose of this book is to examine the performance of Guyana's economy during the era of dirigisme and the period of economic liberalisation with emphasis on a market economy using all available micro and macro data In a much broader and meaningful sense this book deals with the socio economic progress of Guyana from the 1960s with heavy emphasis on the market reforms because this is the dominant and interesting story for policy lessons in the Third World This book also focuses on what has happened to poverty inequality and other social indicators during the reform period Until now there has not been any systematic examination of the effects of the economic reforms in Guyana on unemployment wages and industrial activity poverty and inequality farmers response to price liberalisation education and health indicators ethnicity and growth and governance crime and corruption These issues and more are the subject matter of this book The book refers to those aspects of Guyana's history and recent political events that bear directly on economic policy and the performance of the economic system

Indian Diaspora in the United States Anjali Sahay, 2009-05-16 Indian Diaspora in the United States takes a new perspective on the topic of brain drain departing from the traditional literature to include discussions on brain gain and brain circulation using Indian migration to the United States as a case study Sahay acknowledges that host country policies create the necessary conditions for brain drain to take place but argues that source countries may also benefit from out migration of their workers and students These benefits are measured as remittances investments and savings associated with return and social networking that links expatriates with their country of origin Through success and visibility in host societies diaspora workers further influence economic and political benefits for their home countries This type of brain gain becomes an element of soft power for the source country in the long term Indian

Diaspora in the United States is a ground breaking work that intersects economic and political issues to the dimension of migration and the concerns over brain drain With its rigorous connectionist approach this book is a valuable contribution to the fields of diaspora labor globalization and Indian studies **Battleground: Business** Peg Thoms,Michael

Peter Smith,Adrian Favell, Alongside flows of trade and capital the free movement of professionals technical personnel and students is seen as a key aspect of globalization Yet not much detailed empirical research has been completed about the trajectories and experiences of these highly skilled or highly educated international migrants What little is known about these forms of global mobility and the politics that surround them contrasts with the abundant theories and accounts of other types of international migration such as low income economic migration from less developed to core countries in the international political economy Drawing on the work of a long standing discussion group at the Center for Comparative and Global Research of UCLA s International Institute this collection bridges conventional methodological divides bringing together political scientists sociologists demographers and ethnographers It explores the reality behind assumptions about these new global migration trends It challenges widely held views about the elite characteristics of these migrants the costs and consequences of the brain drain said to follow from the migration of skilled workers the determinants of national policies on high skilled migrants and the presumed effortlessness of professional mobility in an integrating world The volume also sheds new light on international student migration the politics of temporary non immigrant workers in the United States new international forms of regulating movement and the realities of the everyday lives of multinational employees in the world s

transnational cities Key differences between the regional contexts of this migration in Europe North America and the Asia Pacific are also emphasized Michael Peter Smith is professor of community studies at the University of California Davis He has published extensively on urban theory globalization and transnationalism including *Transnationalism from Below* and *City and Nation* both available through Transaction and Transnational Urbanism Adrian Favell is associate professor of sociology at UCLA He is the author of *Philosophies of Integration* and has published widely on migration in Europe citizenship the integration of immigrants and on social theory
