chapters with each chapter containing clinically relevant bullet points and or salient features that receiving providers who are generally adult trained should keep in mind when continuing mental health treatment from the child and adolescent system Chapters will cover a wide range of challenges that are unique to transition age youths including their unique developmental needs anxiety mood and personality disorders at the interface of this development trauma and adjustment disorders special populations and a wide range of other topics Each chapter will begin with a clinical pearl about each topic before delving into the specifics **Lodging** ,2004
