Hartley, G.M. Seitz, A.V. Borovik, R.M. Bryant, 2012-12-06 This volume contains the proceedings of the NATO Advanced Study Institute on Finite and Locally Finite Groups held in Istanbul Turkey 14 27 August 1994 at which there were about 90 participants from some 16 different countries The ASI received generous financial support from the Scientific Affairs Division of NATO

INTRODUCTION A locally finite group is a group in which every finite set of elements is contained in a finite subgroup The study of locally finite groups began with Schur's result that a periodic linear group is in fact locally finite The simple locally finite groups are of particular interest In view of the classification of the finite simple groups and advances in representation theory it is natural to pursue classification theorems for simple locally finite groups This was one of the central themes of the Istanbul conference and significant progress is reported herein The theory of simple locally finite groups intersects many areas of group theory and representation theory so this served as a focus for several articles in the volume Every simple locally finite group has what is known as a Kegel cover This is a collection of pairs G_i N_i I where I is an index set each group G_i is finite $i \in I$

Logical Methods John N. Crossley, Jeffrey B. Remmel, Richard Shore, Moss E. Sweedler, 2012-12-06 The twenty six papers in this volume reflect the wide and still expanding range of Anil Nerode's work A conference on Logical Methods was held in honor of Nerode's sixtieth birthday 4 June 1992 at the Mathematical Sciences Institute Cornell University 1-3 June 1992 Some of the conference papers are here but others are from students co workers and other colleagues The intention of the conference was to look forward and to see the directions currently being pursued in the development of work by or with Nerode Here is a brief summary of the contents of this book We give a retrospective view of Nerode's work A number of specific areas are readily discerned recursive equivalence types recursive algebra and model theory the theory of Turing degrees and recursive sets polynomial time computability and computer science Nerode began with automata theory and has also taken a keen interest in the history of mathematics All these areas are represented The one area missing is Nerode's applied mathematical work relating to the environment Kozen's paper builds on Nerode's early work on automata Recursive equivalence types are covered by Dekker and Barback the latter using directly a fundamental metatheorem of Nerode Recursive algebra is treated by George Richards group representations Recursive model theory is the subject of papers by Hird Moses and Khoussainov Dadajanov while a combinatorial problem in recursive model theory is discussed in Cherlin Martin's paper Cenzer presents a paper on recursive dynamics

Model Theory Wilfrid Hodges, 1993-03-11 Model theory is concerned with the notions of definition interpretation and structure in a very general setting and is applied to a wide range of other areas such as set theory geometry algebra and computer science This book provides an integrated introduction to model theory for graduate students
