### **Tunnels and Underground**

**Cities: Engineering and Innovation Meet Archaeology, Architecture and Art** Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2020-05-18. Tunnels and Underground: Cities Engineering and Innovation meet Archaeology, Architecture and Art. Volume 3: Geological and geotechnical knowledge and requirements for project implementation contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019, Naples, Italy, 3-9 May 2019. The use of underground space is continuing to grow due to global urbanization, public demand for efficient transportation, and energy saving production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient, and more liveable cities. The contributions cover a wide range of topics from geological and geotechnical key factors for tunnel design, excavation geometry, using digital mapping, real-time monitoring systems, via geotechnical data standardization and management to drone-based deformation monitoring and Probabilistic Fault Displacement Hazard Analysis. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists, and others involved in underground planning, design, and building around the world, and for academics who are interested in underground constructions and geotechnics.
