This Bulletin covers AP50 and AP60 models which are identified by a grey plastic Electronic Module with a black printed label showing a vehicle speedometer image in the lower left corner. This module would normally be mounted behind the vehicle dashboard and has the Cruise Control wiring harness connected with a multi pin plug. If you can locate two Brown wires (one with a White trace line) at the vehicle brake lamp switch they will lead you to this module.

Further, Command Cruise Controls are not suitable for very low speed use such as crop spraying, but are designed to engage in 40kmh School Speed Limit zones as a minimum. If you have purchased a kit for non-specified fitment please do not proceed as the unit will not operate.*

If you have fitted a Cruise Control and found it will not engage on a road test please firstly review the following.
