If you exit the stopwatch mode while a stopwatch operation is in progress, the segments along the top of the upper digital display (elapsed display segments) will indicate the schedule of the current time. Each segment represents one second. This is to let you know that a stopwatch operation is in progress.
- All of the operations in this section are performed in the Stopwatch Mode, which you enter by pressing (C).

Important

- Check to make sure that the speed hand is not moving before you perform any Stopwatch Mode button operation.

Specifying a Distance Value

- The distance value represents kilometers, miles, or any other distance unit you want. Specifying a distance value of 10.0, for example, can mean 10.0 kilometers or 10.0 miles.
 - No speed calculation is performed when 0.0 is specified as the current distance value.
 - For lap time readings, you can specify either the lap distance (times at the top) and the same distance, or the total race distance.
 - For split time readings, you can specify the total race distance only. Though the watch will calculate a speed each time you take a split reading, they will be based on the total race distance, and so they will not indicate actual intermediate split speeds.
