*Democracy in Retreat* Joshua Kurlantzick, 2013-03-19 DIV Since the end of the Cold War the assumption among most political theorists has been that as nations develop economically they will also become more democratic especially if a vibrant middle class takes root This assumption underlies the expansion of the European Union and much of American foreign policy bolstered by such examples as South Korea the Philippines Taiwan and even to some extent Russia Where democratization has failed or retreated aberrant conditions take the blame Islamism authoritarian Chinese influence or perhaps the rise of local autocrats divDIV divDIV But what if the failures of democracy are not exceptions In this thought provoking study of democratization Joshua Kurlantzick proposes that the spate of retreating democracies one after another over the past two decades is not just a series of exceptions Instead it reflects a new and disturbing trend democracy in worldwide decline The author investigates the state of democracy in a variety of countries why the middle class has turned against democracy in some cases and whether the decline in global democratization is reversible div

**Manipulating Globalization** Ling Chen, 2018-06-12 The era of globalization saw China emerge as the world's manufacturing titan However the made in China model with its reliance on cheap labor and thin profits has begun to wane Beginning in the 2000s the Chinese state shifted from attracting foreign investment to promoting the technological competitiveness of domestic firms This shift caused tensions between winners and losers leading local bureaucrats to compete for resources in government budget funding and tax breaks While bureaucrats successfully built coalitions to motivate businesses to upgrade in some

cities in others vested interests within the government deprived businesses of developmental resources and left them in a desperate race to the bottom In *Manipulating Globalization* Ling Chen argues that the roots of coalitional variation lie in the type of foreign firms with which local governments forged alliances Cities that initially attracted large global firms with a significant share of exports were more likely to experience manipulation from vested interests down the road compared to those that attracted smaller foreign firms The book develops the argument with in depth interviews and tests it with quantitative data across hundreds of Chinese cities and thousands of firms Chen advances a new theory of economic policies in authoritarian regimes and informs debates about the nature of Chinese capitalism Her findings shed light on state led development and coalition formation in other emerging economies that comprise the new globalized generation
