

## KONE MONOSPACE® 500

# Environmental product declaration

KONE Environmental Product Declarations, or EPDs, provide independently verified information about the environmental performance of our products. EPDs are based on Life Cycle Assessment (LCA) data from studies carried out in compliance with the ISO 14040 standard.

This EPD lists all the components and environmental impacts of a representative sampling of our products throughout their life cycles, including energy and material consumption, waste generation, and emissions.

This EPD is a self-declaration developed in compliance with the ISO 14025 standard for Product Self-Declarations. The Life Cycle Assessment on which this EPD is based was jointly conducted by KONE and VTT Technical Research Centre of Finland.

Buildings Twelfth Edition is the industry standard reference that comprehensively covers all aspects of building systems. With over 2 200 drawings and photographs the book discusses basic theory, preliminary building design guidelines and detailed design procedure for buildings of all sizes. The updated twelfth edition includes over 300 new illustrations plus information on the latest design trends, codes and technologies, while the companion website offers new interactive features including animations, additional case studies, quizzes and more. Environmental control systems are the components of a building that keep occupants comfortable and help make the building work. Mechanical and Electrical Equipment for Buildings covers both active controls like air conditioners and heaters as well as passive controls like daylighting and natural ventilation. Because these systems comprise the entire energy use and costs of a building's life, the book stresses the importance of sustainability considerations during the design process by both architects and builders. Authored by two leading green design educators, MEEB provides the most current information on low energy architecture including topics like Context, comfort and environmental resources, Indoor air quality and thermal control, Illumination, acoustics and electricity, Fire protection, signal systems and transportation. Occupant comfort and building usability are the most critical factors in the success of a building design and with environmental concerns mounting, it's becoming more and more important to approach projects from a sustainable perspective from the very beginning. As the definitive guide to environmental control systems for over 75 years, Mechanical and Electrical Equipment for Buildings is a complete resource for students and professionals alike.

*Essentials of Contract Drafting and Negotiation for Construction Professionals* Gary Soo, Peter Cheng, 2022-04-11

*Essentials of Contract Drafting and Negotiation for Construction Professionals* is a practical and user friendly guide to common practical contractual matters and is intended for construction professionals involved in contract drafting and negotiating. Knowing how to draft an effective contract is crucial in construction, particularly because of the complex and technical nature of construction projects. Divided into six chapters, this guide will enhance and refresh essential knowledge for lawyers and construction professionals who need to understand the principles of drafting and interpreting construction contracts, how to clearly identify and include key elements in these contracts as well as how to avoid legal traps and pitfalls in contract negotiations and enforcement. This book is timely given that many governments around the world are boosting their construction industry as part of greater economic development plans. Effective negotiation and the careful drafting of contracts are critical to minimizing risks. This book takes a practical and pragmatic approach to analysing statutory and legal precedents. It will doubtlessly assist readers in understanding the guiding principles from contract drafting to implementation. Christopher To, barrister at law, Gilt Chambers. This book on contract drafting and negotiation is written in simple language. It is the product of a number of experts who specialize in relevant areas and is edited by a very experienced construction barrister and a renowned practitioner in real estate and construction. The book will surely be a valuable reference for construction and legal practitioners and also students in the relevant
