Le Monde Byzantin Tome L'empire Byzantin:

The Oxford Handbook of Byzantine Art and Architecture Ellen C. Schwartz, 2021-11-19 Byzantine art has been an underappreciated field often treated as an adjunct to the arts of the medieval West if considered at all. In illustrating the richness and diversity of art in the Byzantine world, this handbook will help establish the subject as a distinct field worthy of serious inquiry. Essays consider Byzantine art as art made in the eastern Mediterranean world including the Balkans, Russia, the Near East, and north Africa between the years 330 and 1453. Much of this art was made for religious purposes, created to enhance and beautify the Orthodox liturgy and worship space as well as to serve in a royal or domestic context. Discussions in this volume will consider both aspects of this artistic creation across a wide swath of geography and a long span of time. The volume marries older object-based considerations of themes and monuments which form the backbone of art history to considerations drawing on many different methodologies: sociology, semiotics, anthropology, archaeology, reception theory, deconstruction theory, and so on, in an up-to-date synthesis of scholarship on Byzantine art and architecture. **The Oxford Handbook of Byzantine Art and Architecture** is a comprehensive overview of a particularly rich field of study, offering a window into the world of this fascinating and beautiful period of art.

Latins in Roman (Byzantine) Histories Samuel Pablo Müller, 2021-12-13 Samuel P. Müller offers here the first book-length study of the image of Latins in Byzantine historiography of the long twelfth century, arguing that this image is more complex and ambivalent than often claimed.

Brill's Companion to the Reception of Alexander the Great, 2018-09-11 Brill's Companion to the Reception of Alexander the Great offers a considerable range of topics of interest to students and academics alike in the long tradition of this subject's significant impact across a sometimes surprising and comprehensive variety of areas. Arguably, no other historical figure has cast such a long shadow for so long a time. Every civilisation touched by the Macedonian Conqueror, along with many more that he never imagined, has scrambled to own some part of his legacy. This volume canvasses a comprehensive array of these receptions, beginning from Alexander's own era and journeying up to the present in order to come to grips with the impact left by this influential but elusive figure.

Microstructures and Mobility in the Byzantine World Claudia Rapp, Yannis Stouraitis, 2024-01-22 The volume, whose chapters originated at panels at the International Byzantine Congress in Belgrade and at the IMC in Leeds, seeks to offer an introduction into various aspects of social and geographical mobility and the intrinsic relationship between the two, as well as into the microstructures of social action in the Byzantine world during the high and late Middle Ages. Based on a balanced approach to the role of personal agency and social structure, the authors of the individual chapters seek to clarify how and why various kinds of people mobilized to either change place and/or social position or to form groups whose actions shaped social reality both at the imperial centre and the provincial periphery.

Guilds, Price Formation and Market Structures in Byzantium George C. Maniatis, 2024-12-11 The essays reproduced in this volume analyze the guild system in Byzantium and the West and investigate for the first time the process of price

formation in Byzantium Innovative approaches are devised to fathom the conceptual basis institutional parameters market organization and structures and market dynamics which shaped price determination Correlatively it is persuasively established that the Byzantine guilds unlike their counterparts in the West did not fix prices through concerted action as they did not command the requisite market power or institutional support Fundamentally these studies argue that the Byzantine economy was market oriented as the state was quite circumspect in its interventions and pursued market based policies within a regulatory framework aimed to thwart unfair business practices protect the consumer curb the concentration of economic power and prevent the emergence of monopolistic market structures The competitive process and market mechanism were buttressed by a panoply of legal and other institutional arrangements aimed to frustrate anti competitive practices and ensure correct business conduct to maintain a level playing field Even in guild organized sectors the authorities did not interfere with the firms decision making process relying on the dynamic interaction of market forces and letting the market mechanism take hold The long standing notion of a command and control economy is indefensible

Niketas Choniates Alicia Simpson, 2013-09-26 Simpson uncovers the complex manuscript tradition and transmission of Niketas Choniates History an important historical Byzantine text Investigating issues related to historical narrative and imperial biography the volume explores the historian s sources and the literary models and historical concepts which guided him *Byzantium in a Changing World* James Howard-Johnston, 2025-06-13 Byzantium is commonly taken to be a somewhat exotic entity on the margin of medieval Europe bureaucratic Greek rather than Latin speaking Orthodox rather than Catholic wealthy and effete relying on cunning rather than martial exploits to foil its enemies Since the great majority of primary sources emanate from the polity s capital it is viewed from the inside out and from the top down Byzantium in a Changing World takes a very different approach viewing Byzantium and its east Roman predecessor from the outside as they cope with all manner of external threats above all the Sasanian empire and later the Arabs after they destroyed the ancient world order in the seventh century What emerges is the history of a state which managed to preserve its ideology its culture its religion and its fundamental structures as it was assailed from without In addition to the two great eastern adversaries a succession of predatory powers was fought off Huns and Avars in late antiquity followed by Bulgars in the dark age joined by Hungarians Pechenegs and Rus in the following era of revival In this accessible introduction to the history of Byzantium with six chronologically organised chapters covering the period from Late Antiquity until the fall of the Byzantine Empire in 1453 James Howard Johnston argues that Byzantium geared itself to war in the seventh century that the peasant village emerged as the basis of the social order and that it was a guerrilla style of warfare combined with well targeted diplomatic activity which ensured the state s survival and subsequent revival **Greek Rhetoric Under Christian Emperors** George Alexander Kennedy, 2008-05-01 Kennedy s exposition is lucid and elegant his enthusiasm for his subject infectious Accordingly the reader approaching that subject for the first time will be frequently enlightened but never bored indeed he

will probably be stimulated to turn to the author's earlier works for further enlightenment. From the review of the original printing by J. D. Frendo in *The Classical Review* vol 34 no 2 1984 pp 204-5. Harvard Studies in Classical Philology Harvard University Department of Classics, 1890. Ordinary Jerusalem, 1840-1940 Angelos Dalachanis, Vincent Lemire, 2018-08-13. In *Ordinary Jerusalem* Angelos Dalachanis, Vincent Lemire and thirty-five scholars depict the ordinary history of an extraordinary global city in the late Ottoman and Mandate periods. Utilizing largely unknown archives, they revisit the holy city of three religions which has often been defined solely as an eternal battlefield and studied exclusively through the prism of geopolitics and religion. At the core of their analysis are topics and issues developed by the European Research Council funded project *Opening Jerusalem Archives For a Connected History of the Holy City 1840-1940*. Drawn from the French vocabulary of geography and urban sociology, the concept of *citadinité* describes the dynamic identity relationship a city's inhabitants develop with each other and with their urban environment. Asia Minor in the Long Sixth Century Ine Jacobs, Hugh Elton, 2018-10-18. Asia Minor is considered to have been a fairly prosperous region in Late Antiquity. It was rarely disturbed by external invasions and remained largely untouched by the continuous Roman-Persian conflict until very late in the period. It was apparently well connected to the flourishing Mediterranean economy and as the region closest to Constantinople is assumed to have played an important part in the provisioning of the imperial capital and the imperial armies. When exactly this prosperity came to an end, the late sixth century, the early middle or even later seventh century remains a matter of debate. Likewise, the impact of factors such as the dust-veil event of 536, the impact of the bubonic plague that made its first appearance in AD 541-542, the costs and consequences of Justinian's wars, the Persian attacks of the early seventh century, and eventually the Arab incursions of around the middle of the seventh century remain controversial. The more general living conditions in both cities and countryside have long been neglected. The majority of the population, however, did not live in urban but in rural contexts. Yet the countryside only found its proper place in regional overviews in the last two decades thanks to an increasing number of regional surveys in combination with a more refined pottery chronology. Our growing understanding of networks of villages and hamlets is very likely to influence the appreciation of the last decades of Late Antiquity. Indeed, it would seem that the sixth century, in particular, is characterized not only by a ruralization of cities but also by the extension and flourishing of villages in Asia Minor, the Roman Near East, and Egypt. This volume's series of themes include the physical development of large and small settlements, their financial situation, and the proportion of public and private investment. Imperial, provincial, and local initiatives in city and countryside are compared, and the main motivations examined, including civic or personal pride, military incentives, and religious stimuli. The evidence presented will be used to form opinions on the impact of the plague on living circumstances in the sixth century and to evaluate the significance of the Justinianic period. *En Sofía mathitéfsantes: Essays in Byzantine Material Culture and Society in Honour of Sophia Kalopissi-Verti* Charikleia Diamanti, Anastasia Vassiliou, 2019-12-19. Religious Violence in the Ancient World Jitse H. F. Dijkstra, Christian R. Raschle, 2020-10 A comparative examination and interpretation of religious violence in the Graeco Roman world and Late Antiquity The Legend of Basil the Bulgar-Slayer Paul Stephenson, 2003-08-07 The reign of Basil II 976 1025 the longest of any Byzantine emperor has long been considered as a golden age in which his greatest achievement was the annexation of Bulgaria This we have been told was achieved through a long and bloody war of attrition which won Basil the grisly epithet Voulgartoktonos the Bulgar slayer In this new study Paul Stephenson argues that neither of these beliefs is true Instead Basil fought far more sporadically in the Balkans and his reputation as Bulgar slayer was created only a century and a half later Thereafter the Bulgar slayer was periodically to play a galvanizing role for the Byzantines returning to centre stage as Greeks struggled to establish a modern nation state As Byzantium was embraced as the Greek past by scholars and politicians the Bulgar slayer became an icon in the struggle for Macedonia 1904 8 and the Balkan Wars 1912 13 Union in Separation Autori

Vari, 2016-01-14T00:00:00+01:00 Union in Separation presents a series of case studies on diasporic groups in the late medieval and early modern Mediterranean and Black Sea regions It explores how Armenian Byzantine Greek Florentine Genoese Hospitaller Jewish Mamluk and Venetian communities characterized by diasporic identities and inserted into local contexts navigated religious and socio ethnic boundaries as well as other categories of difference The volume draws on a wide range of historical and social scientific methods and offers new perspectives on the arbitration of difference in the wider

eastern Mediterranean from Tana to Cairo and Marseille to Isfahan prior to the emergence of nation states It provides not only an analytical toolbox for historical diaspora studies but also reveals how under the looming threat of crusade and within the daily routines of trade diasporic groups and their hosts negotiated modes of coexistence that oscillated between cooperation and conflict integration and rejection union and separation **Byzantium in the Seventh Century: 602-634**
