Teaching First-Year College Students Maggie Murphy, 2019-05-15 The first year experience is an emerging hot topic in academic libraries and many librarians who work with first year students are interested in best practices for engaging and retaining them Professional discussion and interest groups conferences and vendor sponsored awards for librarians working with first year students are popping up left and right A critical aspect of libraries in the first year experience is effective information literacy instruction for first year students Research shows that despite growing up in a world rife with technology and

information students entering college rarely bring with them the conceptual understandings and critical habits of thinking needed for finding evaluating and ethically using information in both academic and real world contexts Faculty in upper level courses expect students to learn about the research process in their first year of college and instructors in the first year curriculum expect librarians to teach this to their students Despite all this designing teaching and evaluating effective information literacy instruction specifically for first year students is not necessarily intuitive for instruction librarians That is why Teaching First Year College Students A Practical Guide for Librarians is a comprehensive how to guide for both new and experienced librarians interested in planning teaching and assessing library instruction for first year students The book Examines the related histories of library instruction and first year experience initiatives Summarizes and synthesizes empirical research and educational theory about first year students as learners and novice researchers Establishes best practices for engaging first year students through active learning and inclusive teaching Features excerpts from interviews with a number of instruction librarians who work with first year students in a range of positions and instructional contexts Includes examples of activities lesson plans and assessment ideas for first year library instruction for common first year course scenarios Includes a template to use for library instruction lesson planning Written by a library instruction coordinator with a graduate degree in First Year Studies and a first year instruction librarian Teaching First Year College Students A Practical Guide for Librarians is the first comprehensive how to guide for both new and experienced librarians interested in planning coordinating teaching and assessing library instruction for first year students
