700-2200 VA
230 VUSER MANUAL
English

CAUTION: The UPS and connected load total earth leakage current must not exceed 3.5 milliamperes. If the connected load earth leakage current is likely to exceed 2.5 milliamperes or you are unsure, then convert the input lead attachment to either a fixed wiring installation or an industrial plug/socket (e.g. CEE 17 connector). This task should be carried out by a competent electrical engineer who is conversant with local electrical codes/regulations.

9. The UPS output supply sockets may be electrically live whenever the input power lead is plugged into the mains supply socket. Turning the UPS OFF does not electrically isolate the internal parts. To isolate the UPS, turn the UPS OFF then isolate it from the mains supply.
10. When installing the UPS or making input and output connections, comply with relevant safety standards (e.g. IEC950, VDE0805, EN50091-1).
11. This equipment complies with the requirements of the EMC Directive 89/336/EEC and the published technical standards. Continued compliance requires installation in accordance with these instructions and the use of manufacturer approved accessories with output cables not exceeding 10 metres (30 ft.) in length. Use a shielded cable for the external communications interface.
12. Operate UPS only from a properly earthed, 50 Hz or 60 Hz, 220-240 VAC mains supply. Models are available for 100-127 VAC supply voltages.
13. Route power supply leads so they are not walked on or pinched.
14. Never block or insert any object into the ventilation holes or other openings. Maintain a minimum clearance of 100 mm (4 inches) all around the UPS for proper air flow and cooling.
15. Operate the UPS in an indoor environment only, with an ambient temperature range of 0° C to +40° C (32° F to +104° F). Install it in a clean environment, free from moisture, flammable liquids, gasses, or corrosive substances.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: Do not attempt to service this product yourself except to replace the battery. Opening or removing the cover may expose you to dangerous voltages, even when the AC cord is disconnected from the electrical outlet. Refer all servicing to qualified service personnel.

1. **SAVE THESE INSTRUCTIONS. THIS MANUAL CONTAINS IMPORTANT SAFETY INSTRUCTIONS.** Read all safety and operating instructions before operating the Uninterruptible Power System (UPS). Adhere to all warnings on the unit and in this manual. Follow all operating and user instructions.
2. This product is designed for Commercial/Industrial use only. It is not intended for use with life support and other designated "critical" devices. Maximum load must not exceed that shown on the UPS rating label. If uncertain, consult your dealer. See Limited Warranty.
3. When replacing the batteries, use the appropriate Liebert-Approved Replacement Battery Kit. Proper disposal of batteries is required. Refer to your local laws and regulations for disposal requirements.
4. Always turn off the UPS and unplug it before starting the battery replacement procedure. To replace batteries, refer to the battery replacement procedure. If you feel unqualified to replace the batteries, do not open the battery door. Refer all servicing to qualified service personnel.
5. **CAUTION:** Do not open or mutilate the batteries. Released electrolyte is harmful to skin and eyes and may be toxic.
6. The mains supply socket or means of isolation must be within 2 metres of the equipment and accessible to the operator. The UPS is designed for data processing equipment.
7. The UPS comes with two output power leads with moulded connectors. Do not modify the output power leads. Consult dealer if connector does not match the load socket. UPS must be earthed at all times while in use. Turn UPS off before unplugging it, or the safety earth will be removed.
8. The PowerSure Interactive models 700 VA, 1000 VA, and 1400 VA are not supplied with an input power lead for connection to the mains supply socket. Use the input mains supply power lead from your data processing equipment to connect the UPS to the mains supply. For the 2200 VA model, use the supplied 16 ampere rated input mains supply leads. For UK supply systems, consult a qualified electrician to connect the lead supplied for the 2200 VA model to the mains supply. Note caution on following page.

INTRODUCTION & SYSTEM DESCRIPTION

Congratulations on your choice of the Liebert PowerSure™ Interactive Uninterruptible Power System (UPS). It provides conditioned power to microcomputers and other sensitive electronic equipment.

Upon generation, AC power is clean and stable. However, during transmission it may be subject to voltage sags, spikes, or complete power failure which may interrupt computer operations, cause data loss, or even damage equipment. The PowerSure™ Interactive protects equipment from these disturbances.

The PowerSure™ Interactive comes in nominal power ratings of 700, 1000, 1400, or 2200 VA. Complete specifications appear near the end of this section.

The PowerSure™ Interactive is a compact, "line interactive" UPS. A "line interactive" UPS continuously conditions and regulates its output voltage, whether the mains power is present or not. It supplies connected equipment with clean sine-wave power, to simulate as much as possible, the power generated by the mains. Sensitive electronic equipment operates best from sine-wave power.

For ease of use, the PowerSure™ Interactive contains a light emitting diode (LED) bar display to indicate either "load percentage" or "battery capacity" depending upon the mode of operation. It also provides self diagnostics, a combination alarm silence/battery test button, and two levels of alarms when the unit is operating on battery.

The PowerSure™ Interactive has an interface port for communications between the UPS and a LAN server or other computer system. This port provides detailed operating information including voltages, currents, and alarm status to the host system when used in conjunction with Liebert SiteNet® software. SiteNet® software can also remotely control UPS operation.
