Fisher,2025-01-31 Social Justice Through Sport and Exercise Psychology Intergenerational Voices and An Embodied Approach provides a narration of the history of social justice work in sport and exercise psychology as advanced through the voices of those leaders who have dared to imagine a more just and equitable sporting world By situating their history through critical genealogy within an analysis of the larger social relationships of power in both the competitive sporting context and the field of sport and exercise psychology including patriarchy sexism racism classism ableism and homonegativity an effort is made to illuminate their

political lineages and how these individuals utilized social justice theories and critical reflexivity in their work The fourfold purpose of this brand new and cutting edge volume is to 1 frame the critical genealogy and political lineages of leaders in the field of sport and exercise psychology who have promoted social justice in their work 2 provide an autobiographical sketch for each of the authors that chronicles the ways their life experiences and trajectories have influenced their respective philosophies of social justice 3 flesh out how those philosophies are evidenced both implicitly and explicitly in their work and 4 illustrate how a social justice framework has informed their respective consulting philosophies Social Justice Through Sport and Exercise Psychology Intergenerational Voices and An Embodied Approach is key reading not only for scholars students and practitioners in the field of sport and exercise psychology but also for those in the subdisciplines of sport sociology athletic training and strength and conditioning as well as licensed professional counsellors licensed clinical social workers and certified athletic trainers

The Battle of the Classics Eric Adler, 2020-09-04 These are troubling days for the humanities In response a recent proliferation of works defending the humanities has emerged But taken together what are these works really saying and how persuasive do they prove The Battle of the Classics demonstrates the crucial downsides of contemporary apologetics for the humanities and presents in its place a historically informed case for a different approach to rescuing the humanistic disciplines in higher education It reopens the passionate debates about the classics that took place in late nineteenth and early twentieth century America as a springboard for crafting a novel foundation for the humanistic tradition Eric Adler demonstrates that current defenses of the humanities rely on the humanistic disciplines as inculcators of certain poorly defined skills such as critical thinking It criticizes this conventional approach contending that humanists cannot hope to save their disciplines without arguing in favor of particular humanities content As the uninspired defenses of the classical humanities in the late nineteenth century prove instrumental apologetics are bound to fail All the same the book shows that proponents of the Great Books favor a curriculum that is too intellectually narrow for the twenty first century The Battle of the Classics thus lays out a substance based approach to undergraduate education that will revive the humanities even as it steers clear of overreliance on the Western canon The book envisions a global humanities based on the examination of masterworks from manifold cultures as the heart of an intellectually and morally sound education
