Rury, 2020-04-15 Creating the Suburban School Advantage explains how American suburban school districts gained a competitive edge over their urban counterparts John L. Rury provides a national overview of the process focusing on the period between 1950 and 1980 and presents a detailed study of metropolitan Kansas City a region representative of trends elsewhere While big city districts once were widely seen as superior and attracted families seeking the best educational opportunities for their children suburban school systems grew rapidly in the post World War II era as middle class and more affluent families moved to those communities As Rury relates at the same time economically dislocated African Americans migrated from the South to center city neighborhoods testing the capacity of urban institutions As demographic trends drove this urban suburban divide a suburban ethos of localism contributed to the socioeconomic exclusion that became a hallmark of outlying school systems School districts located wholly or partly within the municipal boundaries of Kansas City Missouri make for revealing cases that illuminate our understanding of these national patterns As Rury demonstrates struggles to achieve greater educational equity and desegregation in urban centers contributed to so called white flight and what Senator Daniel Patrick Moynihan considered to be a crisis of urban education in 1965 Despite the often valiant efforts made to serve inner city children and bolster urban school districts this exodus Rury cogently argues created a new metropolitan educational hierarchy a mirror image of the urban centric model that had prevailed before World War II The stubborn perception that suburban schools are superior based on test scores and budgets has persisted into the twenty first century and instantiates today s metropolitan landscape of social economic and educational inequality **Marxism and Urban Culture** Benjamin Fraser, 2014-04-24 Marxism and Urban Culture is the first volume to reconcile social science and humanities perspectives on culture Covering a range of global cities Bologna Buenos Aires Guatemala City Liverpool London Los Angeles Madrid Mahalla al Kubra Mexico City Montreal Osaka Strasbourg Vienna the contributions fuse political and theoretical concerns with analyses of urban cultural practices and historical movements as well as urban themed literary and filmic art Conceived as a response to the persistent rift between disciplinary Marxist approaches to culture this book prioritizes the urban problematic and builds implicitly and explicitly on work by numerous thinkers not only Karl Marx but also David Harvey Henri Lefebvre Friedrich Engels and Antonio Gramsci among others Rather than reanimate reductive views either of Marx or of urban theory the chapters in Marxism and Urban Culture speak broadly to the interdisciplinary connections that are increasingly the concern of cultural scholars working across and beyond the boundaries of geography sociology history political science language and literature fields film studies
