Treasure Hunt Michael J. Silverstein, John Butman, 2006-05-04 The essential follow up to the BusinessWeek bestseller Trading Up A BMW in a Costco parking lot A working class family with a 50 inch plasma TV What's going on in the mind of the new consumer Today's consumers can seem impossible to understand and even harder to please For instance the average mall shopper will spend about 100 then leave when she hits that limit She'll probably buy shoes rather than clothing because she doesn't want to think about her dress size And the store most likely to get her money isn't the one with the nicest display or the deepest discounts it's the one closest to her parking spot In his consulting with dozens of leading companies Michael J Silverstein has interviewed thousands of customers extracting fascinating patterns about what really drives their purchase decisions His first book the acclaimed bestseller Trading Up has taught a generation of marketers about the new luxury phenomenon and why consumers will happily pay a steep premium for goods and services that are emotionally satisfying from golf clubs to bathroom fixtures to beauty products But Trading Up revealed only part of the story of the new consumer The same middle class people who are happily trading up at Victoria's Secret and Panera are going on treasure hunts at Costco and Home Depot And they are often getting as much emotional satisfaction in the discount stores as in the luxury stores TREASURE HUNT shows how even the most mundane shopping for things like paper towels and pet food has become an adventure rather than a tedious chore In just about every category both the high end and the low end are growing and innovation rich Many middle class consumers gladly spend 5 a day for a Starbucks venti latte others spend forty cents a day on home brewed coffee feel good about their frugality and save up the difference to buy Apple's newest Nano TREASURE HUNT explains the success of companies as diverse as Dollar General H E Butt eBay Commerce Bank and Tchibo But beware in our bifurcated global market businesses need a clear strategy for aiming high or low while avoiding the treacherous middle where so many have recently stumbled If your offering isn't exciting enough to inspire trading up but not enough of a bargain to satisfy the treasure hunters you'll have no emotional connection with your target audience And then as many fallen companies have discovered your tried and true marketing strategies will go into a severe stall TREASURE HUNT takes us into the homes of real people making real decisions and into the CEO's offices of innovative companies finding new ways to accommodate them Written with the same flair empathy and intelligence that made Trading Up an instant classic this is an essential guide to the moods and habits of the constantly

Fast Food, Fast Talk Robin Leidner, 1993-08-04 Attending Hamburger University Robin Leidner observes how McDonald's trains the managers of its fast food restaurants to standardize every aspect of service and product Learning how to sell life insurance at a large midwestern firm she is coached on exactly what to say how to stand when to make eye contact and how to build up Positive Mental Attitude by chanting I feel happy I feel terrific Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers language looks attitudes ideas and demeanor Her study reveals the complex and often unexpected results that come with the routinization of service work Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers Combined Insurance goes further than McDonald's in attempting to standardize the workers very selves instilling in them adroit maneuvers to overcome customer resistance The routinization of service work has both poignant and preposterous consequences It tends to undermine shared understandings about individuality and social obligations sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture Richly anecdotal and accessibly written Leidner's book charts new territory in the sociology of work With service sector work becoming increasingly important in American business her timely study is particularly welcome
