Open Standards and the Digital Age Andrew L. Russell,2014-04-28 How did openness become a foundational value for the networks of the twenty first century Open Standards and the Digital Age answers this question through an interdisciplinary history of information networks that pays close attention to the politics of standardization For much of the twentieth century information networks such as the monopoly Bell System and the American military s Arpanet were closed systems subject to centralized control In the 1970s and 1980s however engineers in the United States and Europe experimented with design strategies to create new digital networks In the process they embraced discourses of openness to describe their ideological commitments to entrepreneurship technological innovation and participatory democracy The rhetoric of openness has flourished for example in movements for open government open source software and open access publishing but such rhetoric also obscures the ways the Internet and other open systems still depend heavily on hierarchical forms of control

Grid-connected Solar Electric Systems Geoff Stapleton,Susan Neill,2012-11-12 Solar electricity or photovoltaics PV is the world s fastest growing energy technology It can be used on a wide variety of scales from single dwellings to utility scale solar farms providing power for whole communities It can be integrated into existing electricity grids with relative simplicity meaning that in times of low solar energy users can continue to draw power from the grid while power can be fed or sold back into the grid at a profit when their electricity generation exceeds the amount they are using The falling price of the equipment combined with various incentive schemes around the world have made PV into a lucrative low carbon investment and as such demand has never been higher for the technology and for people with the expertise to design and install systems This Expert handbook provides a clear introduction to solar radiation before proceeding to cover electrical basics and PV cells and modules inverters design of grid connected PV systems system installation and commissioning maintenance and trouble shooting health and safety economics and marketing Highly illustrated in full colour throughout this is the ideal guide for electricians builders and architects housing and property developers home owners and DIY enthusiasts and anyone who needs a clear introduction to grid connected solar electric technology

The Electronic Communications Code and Property Law Falcon Chambers,2018-10-11 Life now without access to electronic telecommunications would be regarded as highly unsatisfactory by most of the UK population Such ready access would not have been achieved without methodical and ultimately enforceable means of access to the land on which to install the infrastructure necessary to support the development of an electronic communications network Successive governments have made such access a priority regarding it as a principle that no person should unreasonably be denied access to an electronic communications network or electronic communications services The enactment of the Telecommunications Act 1984 and its revision by the Communications Act in 2003 have played their role in the provision of an extensive electronic infrastructure in the UK while their reshaping by means of the Digital

Economy Act 2017 will continue that process Throughout that process a little publicised series of struggles has taken place between telecommunications operators and landowners as they seek to interpret the Electronic Communications Code by which their rights and obligations have been regulated This book describes the problems that accompanied the Old Code which will continue to regulate existing installations and agreements and the intended solutions under the New Code The eminent team of authors explain the background provisions and operation of the old code and the new one providing practical and jargon free guidance throughout It is sure to become the reference on this topic and is intended as a guide for telecommunications operators land owners and of course for their advisers in the legal and surveying professions All members of Falcon Chambers comprising nine Queen s Counsel and 30 junior barristers specialise in property law and allied topics including the various incarnations of the Electronic Communications Code Members of Falcon Chambers including all the authors of this new work have for many years lectured and written widely on the code and have appeared acting for both operators and landowners in many of the few reported cases on the subject of the interface between property law and the code including for example *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2010 *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2011 *Crest Nicholson Operations Ltd v Arqiva Services Ltd* 2015 *Brophy v Vodafone Ltd* 2017 **The New Handbook for Electricians** Martin Clifford, Jerrold R.
