Committee on Appropriations. Subcommittee on Homeland Security, 2012 *Homeland Security* Mark L. Goldstein, 2010-06

The September 11 terrorist attacks have heightened concerns about the security of the nation's icons and parks which millions of people visit every year. The National Park Service (NPS) within the Dept of the Interior is responsible for securing nearly 400 park units that include icons and other parks. In 2004 an audit identified a set of key protection practices that include allocating resources using risk management leveraging technology information sharing and coordination performance measurement and testing and strategic management of human capital. This report determined whether the NPS's security efforts for national icons and parks reflected key practices. Includes recommendations. Monthly Catalogue, United States Public Documents, 1984 *National Security Division Progress Report* United States. Department of Justice. National Security Division, 2008 Handbook of Water and Wastewater Systems Protection Robert M. Clark, Simon Hakim, Avi Ostfeld, 2011-09-01

Following the events of 9/11 the Administrator of the US Environmental Protection Agency created the Water Protection Task Force (WPTF) which identified water and wastewater systems as a major area of vulnerability to deliberate attack. The WPTF suggested that there are steps that can be taken to reduce these vulnerabilities and to make it as difficult as possible for potential saboteurs to succeed. The WPTF recommended that be scrutinized with renewed vigor to secure water and wastewater systems against these possible threats. It also recommended that water and wastewater systems have a response plan in place in the event an act of terrorism occurs. The WPTF identified water distribution networks as an area of special vulnerability and highlighted the need for rapid on line detection methods that are accurate and have a wide detection range. As a result of these recommendations novel technologies from various fields of science and engineering are now addressing water security issues and water and wastewater utilities are looking for innovative solutions. Once such technologies are available there will be a rapid implementation process that will present many business opportunities for the private sector. However in addition to terrorist threats water and wastewater systems are inherently vulnerable to natural disasters such as earthquakes and floods. This volume will address the problems associated with both intended terrorist attacks and natural disasters affecting water or wastewater systems. The book is divided into parts based on the kinds of threats facing water and wastewater systems 1 a direct attack on water and wastewater

infrastructure storage reservoirs and distribution and collection networks 2 a cyber attack disabling the functionality of the water and wastewater systems or taking over control of key components which might result in system failures and 3 a deliberate chemical or biological contaminant injection at one of the water distribution system's nodes It will examine unique plans technological and managerial innovations for protecting such systems and includes descriptions of projects that were implemented to respond to natural disasters Case studies are presented that discuss existing projects and evaluate their performance with an emphasis on providing guidelines and techniques that can be implemented by water and wastewater planners and managers to deal with natural and manmade disasters should they occur **Office of Technology**

Press Lee C. Bollinger, Geoffrey R. Stone, 2021 Written by a group of the nation's leading constitutional scholars a deeply informed thoughtful and often surprising examination of who has First Amendment rights to disclose to obtain or to publish classified information relating to the national security of the United States One of the most vexing and perennial questions facing any democracy is how to balance the government's legitimate need to conduct its operations especially those related

to protecting the national security in secret with the public's right and responsibility to know what its government is doing. There is no easy answer to this issue and different nations embrace different solutions. In the United States at the constitutional level the answer begins exactly half a century ago with the Supreme Court's landmark 1971 decision in the Pentagon Papers case. The final decision though left many important questions unresolved. Moreover the issue of leaks and secrecy has cropped up repeatedly since most recently in the Edward Snowden and Chelsea Manning cases. In *National Security Leaks and Freedom of the Press* two of America's leading First Amendment scholars Lee C. Bollinger and Geoffrey R. Stone have gathered a group of the nation's leading constitutional scholars including John Brennan, Eric Holder, Cass R. Sunstein and Michael Morell among many others to delve into important dimensions of the current system to explain how we should think about them and to offer as many solutions as possible.
