Debates in Macroeconomics from the Great Depression to the Long Recession Arie Arnon, 2022-05-06 This book assesses major schools of thought in macroeconomic theory between the Great Depression and the Long Recession focusing on their analysis of cycles crises and macro policy It explores the road from the dominance of Keynesian ideas to those of New Classical Macroeconomics NCM toward the end of the millennium The book covers the early influential work of Knut Wicksell the economic debates of the 1930s with core contributions from John Maynard Keynes and Friedrich von Hayek the rise of Keynesianism in the 1950s and its decline since the 1970s the rise of Monetarism in the 1960s and NCM s subsequent rise to prominence Finally the book outlines how macroeconomics has evolved from its birth in the 1930s as a theory separate from microeconomics resulting in a split between macro and micro theories and ended up with a new hegemonic paradigm based on microfoundations The ensuing policy thinking witnessed a transformation from active macro policy after the Great Depression to a far more passive macro policy during the last quarter of the twentieth century which may have contributed to missing the signs of the impending Long Recession of 2008 When the 2008 crisis struck macroeconomists were caught with models that were theoretically elegant yet inappropriate to the needs of the moment A broader historical perspective may have prevented the jettisoning of Keynesian models that had proved useful in the past and might have done so again This highly readable book by Arie Arnon is a wonderful antidote to economists short time horizon and contributes mightily to restore the profession s collective memory of the diversity of ideas within macroeconomics Professor Dani Rodrik Harvard Kennedy School **Pitman's Journal of Commercial Education** ,1892 *ECRM2014-Proceedings of the*

13th European Conference on Research Methodology for Business and Management Studies Dr Martin Rich, Dr Anne Brown, 2014-06-16 *A Method for Recognizing Fatigue Driving Based on Dempster-Shafer Theory and Fuzzy Neural Network* WenBo Zhu, HuichengYang, Yi Jin, Bingyou Liu, This study proposes a method based on Dempster Shafer theory DST and fuzzy neural network FNN to improve the reliability of recognizing fatigue driving This method measures driving states using multifeature fusion First FNN is introduced to obtain the basic probability assignment BPA of each piece of evidence

given the lack of a general solution to the definition of BPA function Second a modified algorithm that revises conflict evidence is proposed to reduce unreasonable fusion results when unreliable information exists Big Data and Information Theory Jiuping Xu,Syed Ejaz Ahmed,Zongmin Li,2022-06-01 Big Data and Information Theory are a binding force between various areas of knowledge that allow for societal advancement Rapid development of data analytic and information theory allows companies to store vast amounts of information about production inventory service and consumer activities More powerful CPUs and cloud computing make it possible to do complex optimization instead of using heuristic algorithms as well as instant rather than offline decision making The era of big data challenges includes analysis capture curation search sharing storage transfer visualization and privacy violations Big data calls for better integration of optimization statistics and data mining In response to these challenges this book brings together leading researchers and engineers to exchange and share their experiences and research results about big data and information theory applications in various areas This book covers a broad range of topics including statistics data mining data warehouse implementation engineering management in large scale infrastructure systems data driven sustainable supply chain network information technology service offshoring project issues online rumors governance preliminary cost estimation and information system project selection The chapters in this book were originally published in the journal International Journal of Management Science and Engineering Management *Co-Designing Science in Africa* UNESCO,2019-06-28 **Shaping the Future of Biological Education Research** Konstantinos Korfiatis,Marcus Grace,Marcus Hammann,2023-12-01 This open access volume is a collection of full papers based on the peer reviewed presentations accepted for the European Researchers in Didactics of Biology ERIDOB 2022 conference ERIDOB aims to bring together researchers in didactics of Biology from Europe and around the world to share and discuss their research work and results It is the only major international conference whose focus lies exclusively on biology education research and all the papers are written by international researchers from across Europe and beyond which report on a range of contemporary biology education research projects They are all entirely new papers describing new research in the field Each paper has been peer reviewed by experienced biology education researchers and the members of the ERIDOB Academic Committee The selected papers are collated within the following categories of biology education Teaching Strategies and Learning Environments Students Knowledge Conceptions Values Attitudes and Motivation Outdoor and Environmental Education Biology Teachers Professional Development By providing a collection of new research findings from many countries this book is a great resource for researchers and practitioners such as school college and university biology teachers around the world It is useful for training biology teachers and therefore valuable to teacher training institutions MEDINFO 2017: Precision Healthcare Through Informatics A.V. Gundlapalli,M.-C. Jaulent,D. Zhao,2018-01-31 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods applications and technology constantly offering opportunities for supporting the customization of

healthcare to individual patients This book presents the proceedings of the 16th World Congress of Medical and Health Informatics MedInfo2017 held in Hangzhou China in August 2017 which also marked the 50th anniversary of the International Medical Informatics Association IMIA The central theme of MedInfo2017 was Precision Healthcare through Informatics and the scientific program was divided into five tracks connected and digital health human data science human organizational and social aspects knowledge management and quality and safety and patient outcomes The 249 accepted papers and 168 posters included here span the breadth and depth of sub disciplines in biomedical and health informatics such as clinical informatics nursing informatics consumer health informatics public health informatics human factors in healthcare bioinformatics translational informatics quality and safety research at the intersection of biomedical and health informatics and precision medicine The book will be of interest to all those who wish to keep pace with advances in the science education and practice of biomedical and health informatics worldwide

Provisional Cities

Renata Tyszczyk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities

Art, Science, and the Natural World in the Ancient Mediterranean, 300 BC to AD 100 Joshua J. Thomas,2021-12-22 The Hellenistic Period witnessed striking new developments in art literature and science This volume addresses a particularly vibrant area of innovation the study of animals and the natural world While Aristotle and his followers had revolutionized fields such as zoology and botany during the fourth century BC these disciplines took on exciting new directions during Hellenistic times Kings imported exotic species into their royal capitals from faraway lands Travel writers described unusual creatures that they had never previously encountered And buyers from a range of social levels chose works of art featuring animals and plants to decorate their palaces houses and tombs While textual sources shed some light on these developments the central premise of Art Science and the Natural World in the Ancient Mediterranean is that our surviving artistic evidence permits a fuller understanding Accordingly the study brings together a rich body of visual material that invites new observations on how and why knowledge of the natural world became so important during this period It is suggested that this cultural phenomenon affected many different groups in society from kings in Alexandria and Pergamon to provincial aristocrats in the Levant and from the Julio Claudian imperial family to prosperous homeowners in Pompeii By analysing the works of art produced for these individuals a vivid picture emerges of this remarkable aspect of ancient culture

Visuospatial Processing for Education in Health and Natural Sciences Juan C. Castro-Alonso,2019-08-05 Visuospatial processing is key to learn and perform professionally in the domains of health and natural sciences As such there is accumulating research

showing the importance of visuospatial processing for education in diverse health sciences e g medicine anatomy surgery and in many natural sciences e g biology chemistry physics geology In general visuospatial processing is treated separately as a spatial ability and b working memory with visuospatial stimuli This book attempts to link these two research perspectives and present visuospatial processing as the cognitive activity of two components of working memory mostly the visuospatial sketch pad and also the central executive which allows to perform in both spatial ability and working memory tasks Focusing on university education in the fields of health sciences and natural sciences the chapters in this book describe the abilities of mental rotation mental folding spatial working memory visual working memory among others and how different variables affect them Some of these variables thoroughly addressed in the book are sex gender visualizations interactivity cognitive load and embodiment The book concludes with a chapter presenting VAR a battery of computer based tests to measure different tasks entailing visuospatial processing With contributions by top educational psychologists from around the globe this book will be of interest to a broad array of readers across the disciplines

The Study of Science and Religion Carl Reinhold Brakenhielm, 2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i e how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan Soderblom to the present Archbishop Antje Jackelen and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction

Climate Change Adaptation in Eastern Europe Walter Leal Filho, Goran Trbic, Dejan Filipovic, 2018-12-15 This book focuses on managing risks and building resilience to climate change showcasing experiences from research field projects and best practices to foster climate change adaptation in Eastern Europe that can be implemented elsewhere Climate change affects countries in Eastern Europe i e the Western Balkans and Southeast Europe in a variety of ways Apart from severe floods there are reports of decreasing water reserves in the southern regions and of gradual changes in biodiversity and agricultural production In the South Caucasus area for instance climate change models project a decline in precipitation and suggest that it will continue to become drier this century Many Eastern European countries especially the non EU ones have weak national climate policies and transboundary collaborations as well as limited public engagement in matters related to climate change As a result climate change poses a serious threat to their economic stability and development and to the sustainable development of the region The above state of affairs illustrates the need for a better understanding of how climate change influences Eastern Europe and for the identification of processes

methods and tools that may help the countries and the communities in the region to adapt There is also a perceived need to showcase successful examples of how to cope with the social economic and political problems posed by floods droughts in the region especially ways of increasing the resilience of agriculture systems and of communities Addressing this need the book presents papers written by scholars social practitioners and members of government agencies involved in research and or climate change projects in Eastern Europe
