**Consciousness and Being** Robert C. Trundle, 2019-02-14 This book is of vital interest to anyone who yearns to know how science theology ethics art and politics do really afford objective truths Not only that but how these truths in seemingly clashing areas are interrelated by common sense and rooted in our incontrovertible consciousness of Being itself Being itself as the basis for truth is defended against truth denying modern philosophers who having headed in the wrong direction with tragic costs of murderous ideologies have completely misunderstood the simple origin of truth in the realist tradition of Aristotle Aquinas Etienne Gilson and others Their profoundness is not bamboozled by the covert and corrupting sophism of today's teachings Anyone interested in surmounting these teachings that include political correctness and a false divide of fact from value which paralyze the very modern ethics that helped to create them should read this book The book reveals how ethics art and politics can be as true as the sciences that inform them

*Sea Surface Roughness Observed by High Resolution Radar* Atsushi Fujimura,Susanne Lehner,Alex Soloviev,Xiaofeng Li,2019-10-25 Changes in sea surface roughness are usually associated with a change in the sea surface wind field This interaction has been exploited to measure sea surface wind speed by scatterometry A number of features on the sea surface associated with changes in roughness can be observed by synthetic aperture radar SAR because of the change in Bragg backscatter of the radar signal by damping of the resonant ocean capillary waves With various radar frequencies resolutions and modes of polarization sea surface features have been analyzed in numerous campaigns bringing various datasets together thus allowing for new insights into small scale processes at a larger areal coverage This Special Issue aims at investigating sea surface features detected by high spatial resolution radar systems such as SAR
