dismissed as Kant's failed attempt to popularize his philosophy but as the essays collected here show there is much to be gained from a careful study of the work. The essays explore the distinctive features of the *Prolegomena* including Kant's discussion of philosophical methodology, his critical idealism, the nature of experience, his engagement with Hume, the nature of the self, the relation between geometry and physics, and what we cognize about God. Newly commissioned for this volume, the essays as a whole offer sophisticated and innovative interpretations of the *Prolegomena* and cast Kant's critical philosophy in a new light.

**Reason, Method, and Value** Dale Jacquette, 2013-05-02 Nicholas Rescher has enjoyed a long and distinguished career in philosophy writing on many different areas from logic to philosophy of language, epistemology, pragmatism, ethics, and political philosophy and metaphilosophy. *Reason, Method, and Value: A Reader on the Philosophy of Nicholas Rescher* offers a selection of Rescher's writings over a span of decades representing the core of his prodigious research interests in six key areas. Each section of the Reader is accompanied by a compact critical introduction written by a leading philosophical scholar with special expertise in Rescher's philosophy, and the volume opens with an appreciative introduction written by the editor and a concluding retrospective by Rescher looking back over his oeuvre and explaining connecting themes and the unity of system contained in this extensive body of work. Taken together, the volume encapsulates the heart of Rescher's impressive lifelong contributions to philosophy between two covers in a single volume that provides a solid overview of his thought while serving to direct readers to the corpus of Rescher's writings for a more complete picture.

Rescher Studies Robert Almeder, 2013-05-02 In a career extending over almost six decades, Nicholas Rescher has conducted researches in almost every principal area of philosophy, historical and systematic alike. In this extraordinary volume, two dozen scholars join in offering penetrating discussions of various facets of Rescher's investigations. The result is an instructively critical panorama of the many faceted contributions of this important American philosopher. Born in Germany in 1928, Nicholas Rescher came to the U.S. at the age of nine. He is University Professor of Philosophy at the University of Pittsburgh, where he has also served as Chairman of the Philosophy Department and as director and currently chairman of the Center for Philosophy of Science. In a productive research career extending over six decades, he has established himself as a systematic philosopher of the old style. His work represents a many-sided approach to fundamental philosophical issues that weaves together threads of thought from continental idealism and American pragmatism. And apart from this larger program, Rescher has made various specific contributions to logic, the conception of autodescriptive systems of many-sided logic, the history of logic, the medieval Arabic theory of modal syllogistic, to the theory of knowledge, epistemology as a quantitative approach in theoretical epistemology, and to the philosophy of science, the theory of a logarithmic retardation of scientific progress. Rescher has also worked in the area of futuristics and, along with Olaf Helmer and Norman Dalkey, is co-inaugurator of the so-called Delphi method of forecasting. Ten books about Rescher's philosophy have been published in four languages. Rescher earned his doctorate at Princeton in 1951, while still at the age of twenty-two, a record for Princeton's Department of

Philosophy He has served as a President of the American Philosophical Association of the American Catholic Philosophy Association of the American G W Leibniz Society of the C S Peirce Society and of the American Metaphysical Society He was the founder of the American Philosophical Quarterly An honorary member of Corpus Christi College Oxford he has been elected to membership in the European Academy of Arts and Sciences Academia Europaea the Royal Society of Canada the Institut International de Philosophie and several other learned academies Having held visiting lectureships at Oxford Constance Salamanca Munich and Marburg he has been awarded fellowships by the Ford Guggenheim and National Science Foundations Author of some hundred books ranging over many areas of philosophy over a dozen of them translated from English into other languages he is the recipient of eight honorary degrees from universities on three continents He was awarded the Alexander von Humboldt Prize for Humanistic Scholarship in 1984 the Belgian Prix Mercier in 2005 and the Aquinas Medal of the American Catholic Philosophical Association in 2007

**Dictionary of Critical Realism** Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism

**Rethinking Science** Jan Faye, 2018-02-05 This title was first published in 2002 Science and humanity are usually seen as very different the sciences of nature aim at explanations whereas the sciences of man seek meaning and understanding This book shows how these contrasting descriptions fail to fit into a modern philosophical account of the sciences and the arts Presenting some of the major ideas within the philosophy of science on facts explanation interpretation methods laws and theories Jan Faye compares various approaches including his own Arguing that the sciences of nature and the sciences of man share a common practice of acquiring knowledge this book offers a unique introduction to key aspects in the philosophy of science

**An Account of Hope** John Billington, 2007-11 I AM WHO I AM God told Moses But who do you say that I am Jesus asked These dramatic declarations conjure thoughts about God and are perhaps the single most important factor in determining how we will live out our faith What do we believe about God Can His hand really guide our lives perfectly today The issue is being able to trust that God is capable of what He claims and is trustworthy to fulfill it An Account of Hope explores why the God of Christianity is who He says He is and what place reason holds in believing that to be true An Account of Hope is a personal journey answering questions regarding absolute truth in a culture saturated with relativism as well as an inquiry into the belief systems that underpin and sustain our most cherished needs These needs like hope purpose value love forgiveness and meaning define humanity making life worth living An Account of Hope approaches this subject from the thought that any belief system purporting to account for the worlds existence and humanitys needs should be evaluated by how well it accomplishes those tasks
