The Fiction of America Susanne Hamscha,2013-05 The Fiction of America juxtaposes classic literature of the American Renaissance with twentieth century popular culture pairing for instance Ralph Waldo Emerson with Finding Nemo Walt Whitman with Spiderman and Hester Prynne with Madonna to investigate how the Americanness of American culture constitutes itself in the interplay of the cultural imaginary and performance Conceptualizing America as a transhistorical practice Susanne Hamscha reveals disruptive spectral moments in the narrative of America which confront American culture with its inherent inconsistencies

Nature Matrix Robert Michael Pyle,2020-09-15 Nature Matrix is a gathering of some of Robert Michael Pyle s most significant original and timely expressions of a life immersed in the natural world in all its splendor power and peril Nature Matrix New and Selected Essays contains sixteen pieces that encompass the philosophy ethic and aesthetic of Robert Michael Pyle The essays range from Pyle s experience as a young national park ranger in the Sierra Nevada to the streets of Manhattan from the suburban jungle to the tangles of the written word and from the phenomenon of Bigfoot to that of the Big Year a personal exercise in extreme birding and butterflying They include deep profiles of John Jacob Astor I and Vladimir Nabokov as well as excursions into wild places with teachers children and writers The nature of real wilderness in modern times comes under Pyle s lens as does reconsideration of his trademark concept the extinction of experience maybe the greatest threat of alienation from the living world that we face today Nature Matrix shows a way back toward possible integration with the world as it plumbs the range and depth of experience in one lucky life lived in close connection to the physical earth and its denizens This collection brings together the thoughts and hopes of one of our most widely read and respected natural philosophers as he seeks to summarize a life devoted to conservation

Of Matter And Spirit: Selected Essays By Charles P Enz Charles P Enz,2009-01-14 The essays selected for this book comprise ideas presented in oral or written form between 1972 and 2000 some of them originally in German or French They are preceded by a biographical and topical introduction As the title suggests attention is directed on the one hand toward the material world which is viewed in its extreme spatial extensions of the universe and of the elementary particles In particular the fascinating notion of the void and its fluctuating energy is the subject of various discussions as is the subdivision of material bodies and its limits The latter as well as the limit of gravitational stability are depicted in a diagram leading to the ultimate point of the Planck mass and length The other topic of the title is the spiritual realm which as in the Introduction is based on reflections and quotations from religious texts This rather personal aspect is also apparent in the frequent mention of the author s teacher Wolfgang Pauli who on the psychological side is associated with C G Jung and Marie Louise von Franz and on the physical side with Albert Einstein and the author s colleague Ernest Stueckelberg

Kant's System of Nature and Freedom Paul Guyer,2005-04-21 The concept of systematicity is central to Immanuel Kant s conception of scientific

knowledge and to his practical philosophy But Kant also held that we must be able to unite the separate systems of nature and freedom into a single system on the one hand morality itself requires that we be able to see its commands and goals as realizable within nature while on the other hand our experience of nature itself leads us to see it as a system with the goal of human moral development The essays in this volume including two published here for the first time explore various aspects of Kant's conception of the system of nature the system of freedom and the system of nature and freedom The essays in the first part explore the systematicity of concepts and laws as the ultimate goal of natural science consider the implications of Kant's account of our experience of organisms for the goal of the unity of science and examine Kant's attempts to prove that the existence of an ether is a necessary condition for a physical system of nature The essays in the second part explore Kant's view that morality requires a systematic union of persons as ends in themselves and of the ends that persons set for themselves and examine the system of duties and obligations necessary to realize such a systematic union of persons and their ends These essays thus examine both the general foundations of Kant's moral philosophy and his final account of the duties of right or justice and of ethics or virtue in his late work the *Metaphysics of Morals* The essays in the third part examine Kant's attempt in the last of his three great critiques the *Critique of the Power of Judgment* to unify the systems of nature and freedom through a radical transformation of traditional teleology as a theory of the creation of organic nature into an account of our experience of organic nature and of nature as a whole

Richard Rorty and the Problem of Postmodern Experience Tobias Timm, 2019-07-05 Richard Rorty perhaps the most important philosopher of the past century refused to write meaningfully about experience due to his postmodern inclination to associate experience with a belief in objectivity and foundational truths *Richard Rorty and the Problem of Postmodern Experience: A Reconstruction* explores the context reasoning and consequences of this resistance While for much of our history experience was valued for its potential to teach us about the world Rorty and his fellow postmodern thinkers encouraged us to doubt the narrative that we can use experience to make epistemological progress Rather than pursue universal truths about the world Rorty suggested that we recognize all of our beliefs about the world as being social constructions In his project to recover a concept of experience from within the framework Rorty has constructed Tobias Timm describes how classical pragmatist theories of experience are naïve about the problem of foundationalism He also explains how the most common phenomenological work lacks an active subject experience here is simply something that happens to us rather than something we actively seek to improve Timm demonstrates that despite Rorty's insistence that we talk about language instead of experience there are strong experiential elements in his work Rorty's romanticism and his optimism about the accomplishments of western culture are remedial to the pessimism of postmodern discussions about experience

The Myth of the Fall in Nineteenth-Century Literature Linda Freedman, 2025-07-15 Why does the myth of the Fall continue to matter in an increasingly secularised world Why do we continue to imagine a point where everything went wrong and why

must we imagine that things were once better than they are now Modern political theodicies repeatedly play to the myth of the Fall as empowering human authorship promising to take back control or make America great again The myth of the Fall is so absorbed into western culture that we sometimes don't even notice it's there let alone think about why and how it has persisted through secularisation It is often pernicious playing on feelings of innate supremacy and lost dominion Linda Freedman shows that it is also creative the first act of disobedience and resistance which set new human stories in motion and gave narrative shape to existence Nineteenth century writers were so steeped in Christian traditions that the Fall remained an ineluctable structure of thought and even those who resisted or tried to secularise its doctrinal orthodoxies tended to affirm its logic It was a political social and cultural force as well as an aesthetic preoccupation a way of reflecting on the limitations and possibilities of art and literature driving innovations in prose poetry and the novel Rethinking narratives of American exceptionalism with transatlantic and anti racist writings Freedman captures some of the most theologically imaginative and aesthetically and politically interesting textures of the Fall in nineteenth century literature The myth of the Fall survives as much more than a judgmental and repressive social mechanism and mattered to people living vastly different lives this is partly due to the adaptability and force of its narrative logic and partly because it gives narrative time the feel of a quest an infinite search for meaning The Fall holds onto the otherworldly and the unworldly It serves as a formal metalanguage a residually and sometimes explicitly religious aesthetic an origin myth of modernity a source for being in time

Avenging Nature Eduardo Valls Oyarzun, Rebeca Gualberto Valverde, Noelia Malla Garcia, María Colom Jiménez, Rebeca Cordero Sánchez, 2020-09-28 Nature thou art my goddess Edmund's bold assertion in King Lear could easily inspire and at the same time function as a lamentation of the inadequate respect of nature in culture In this volume international experts provide multidisciplinary exploration of the insubordinate representations of nature in modern and contemporary literature and art The work foregrounds the need to reassess how nature is already and has been for a while striking back against human domination From the perspective of literary studies art history media studies ethics and philosophy and ethnology and anthropology Avenging Nature highlights the need of assessing insurgent discourses that converging with counter discourses of race gender or class realize the empowerment of nature from its subaltern position Acknowledging the argument that cultural representations of nature establish a relationship of domination and exploitation of human discourse over nonhuman reality and that in consequence our regard for nature as humanist critics is instrumental and anthropocentric the present volume advocates for the view that the time has come to finally perceive nature's vengeance and to critically probe into nature's ongoing revenge against the exploitation of culture

On the Nature of the Universe Lucretius, 2008-10-09 Therefore this terror and darkness of the mind Not by the sun's rays nor the bright shafts of day Must be dispersed as is most necessary But by the face of nature and her laws Lucretius poem On the Nature of the Universe combines a scientific and philosophical treatise with some of the greatest poetry ever written With intense moral fervour

Lucretius demonstrates to humanity that in death there is nothing to fear since the soul is mortal and the world and everything in it is governed not by the gods but by the mechanical laws of nature. By believing this men can live in peace of mind and happiness. Lucretius bases his argument on the atomic theory expounded by the Greek philosopher Epicurus. His poem explores sensation, sex, cosmology, meteorology, and geology through acute observation of the beauties of the natural world and with moving sympathy for man's place in it. Sir Ronald Melville's accessible and accurate verse translation is complemented by an introduction and notes situating Lucretius' scientific theories within the thought of 1st century BCE Rome and discussing the Epicurean philosophy that was his inspiration and why the issues Lucretius' poem raises about the scientific and poetical views of the world continue to be important.

Nature and the Victorian Imagination U. C. Knoepfelmacher, George B. Tennyson, 2023-12-22

Human Nature, Interest, and Power Tex Sample, 2013-10-17 This book criticizes three basic concepts in Reinhold Niebuhr's social thought: his views of human nature, interest, and power. Attention is directed especially at the way Niebuhr's concepts lack sufficient historicity, obscure social and political dynamics, and finally lack adequate descriptive power. An alternative to each of these concepts is offered and used as a way to open up social thought to more complex analysis, more concrete and material uses, and a discussion of implications for alternative direction and action.
