**Old Testament Conceptual Metaphors and the Christology of Luke's Gospel** Gregory R. Lanier, 2018-08-23 Extensive scholarship has been devoted to Jesus depiction in the Gospels and how such depiction is influenced by the Old Testament Gregory R Lanier presents a new case for the importance of conceptual metaphor arguing that the Gospel of Luke employs certain metaphors reflected in Israel's traditions such as horn of salvation dawn from on high mother bird gathering Jerusalem's children and crushing stone in order to portray the identity of Jesus as both an agent of salvation and more provocatively the one God of Israel Setting his argument at the intersection of three sub fields of New Testament scholarship early Christology the use of Israel's Scriptures in the New Testament and contemporary metaphor theory Lanier suggests ways to overcome the low high binary and perceive the Gospel's Christology as multi faceted Applying metaphor theory to the influence of the Old Testament metaphors on Luke's Christology Lanier adds methodological rigor to the tracing of such influences in cases where standard criteria for quotations and allusions echoes are stretched thin

*Literature and the Metaphoric Universe in the Mind* Nicolae Babuts, 2017-07-05 Nicolae Babuts

believes that the study of metaphoric thought and literature can be enriched by the application of recent discoveries from neuroscientific experiments. He maintains that metaphors are neither linguistic formations nor conceptual formations but instead the product of association of images and language. They are a matter of vision. Memory is an essential component in the creation of meaning and is the way the mind receives messages from the outside world. In this process of transferring data from the outside world, the mind's overriding tendency is to integrate and interpret. Thus incoming messages are recognized and given meaning whether they are in harmony with the inner world of the mind or in conflict with it. Babuts argues that the literature we read is related to our perception of reality. And reality has two identities: the physical identity of the outside world and its symbolic identity within memory. The symbolic identity of the outside world is represented internally by the metaphoric universe in the mind.

**Thinking like a Linguist** Jordan B. Sandoval, Kristin E. Denham, 2021-07-01 This is an engaging introduction to the study of language for undergraduate or beginning graduate students aimed especially at those who would like to continue further linguistic study. It introduces students to analytical thinking about language but goes beyond existing texts to show what it means to think like a scientist about language through the exploration of data and interactive problem sets. A key feature of this text is its flexibility. With its focus on foundational areas of linguistics and scientific analysis, it can be used in a variety of course types with instructors using it alongside other information or texts as appropriate for their own courses of study. The text can also serve as a supplementary text in other related fields: Speech and Hearing Sciences, Psychology, Education, Computer Science, Anthropology, and others to help learners in these areas better understand how linguists think about and work with language data. No prerequisites are necessary. While each chapter often references content from the others, the three central chapters on sound, structure, and meaning may be used in any order.

**Postclassical Greek Prepositions and Conceptual Metaphor** William A. Ross, Steven Edward Runge, 2022-08-01 Traditional semantic description of Ancient Greek prepositions has struggled to synthesize the varied and seemingly arbitrary uses into something other than a disparate, sometimes overlapping list of senses. The Cognitive Linguistic approach of prototype theory holds that the meanings of a preposition are better explained as a semantic network of related senses that radially extend from a primary spatial sense. These radial extensions arise from contextual factors that affect the metaphorical representation of the spatial scene that is profiled. Building upon the Cognitive Linguistic descriptions of Bortone 2009 and Luraghi 2009, linguists, biblical scholars, and Greek lexicographers apply these developments to offer more in-depth descriptions of select postclassical Greek prepositions and consider the exegetical and lexicographical implications of these findings. This volume will be of interest to those studying or researching the Greek of the New Testament seeking more linguistically informed description of prepositional semantics, particularly with a focus on the exegetical implications of choice among seemingly similar prepositions in Greek and the challenges of potentially mismatched translation into English.

Mixed Metaphors Karen Sullivan, 2018-11-29 Critics shudder at mixed metaphors like that wet blanket is a loose cannon.

but admire Life s but a walking shadow a poor player and all the metaphors packed into Macbeth s Tomorrow and tomorrow and tomorrow speech How is it that metaphors are sometimes mixed so badly and other times put together so well In *Mixed Metaphors Their Use and Abuse* Karen Sullivan employs findings from linguistics and cognitive science to explore how metaphors are combined and why they sometimes mix Once we understand the ways that metaphoric ideas are put together we can appreciate why metaphor combinations have such a wide range of effects *Mixed Metaphors Their Use and Abuse* includes analyses of over a hundred metaphors from politicians sportspeople writers and other public figures and identifies the characteristics that make these metaphors annoying amusing or astounding

Theology in the Flesh John Sanders, 2016-08-01 Metaphors and other mental tools are used to reason not just speak about God salvation truth and morality Figurative language structures our theological and moral reasoning in powerful ways This book uses an approach known as cognitive linguistics to explore the incredibly rich ways our conceptual tools derived from embodied life and culture shape the way we understand Christian teachings and practices The cognitive revolution has generated amazing insights into how human minds make sense of the world This book applies these insights to the ways Christians think about topics such as God justice sin and salvation It shows that Christians often share a set of very general ideas but disagree on what the Bible means or the moral stances we should take It explains why Christians often develop a number of appropriate but sometimes incompatible ways to understand the Bible and various doctrines It assists Christians in understanding those with whom they disagree Hopefully simply better understanding how and why people think the way they do will foster better dialogue and greater humility
