Proceedings of the 13th International Congress on Mathematical Education Gabriele Kaiser, 2017-10-31 This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education ICME 13 and is based on the presentations given at the 13th International Congress on Mathematical Education ICME 13. ICME 13 took place from 24th to 31st July 2016 at the University of Hamburg in Hamburg, Germany. The congress was hosted by the Society of Didactics of Mathematics Gesellschaft für Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI. ICME 13 brought together about 3,500 mathematics educators from 105 countries; additionally, 250 teachers from German-speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state of the art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching and learning processes. The book introduces the major activities of ICME 13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME 13. Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME 13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings. **Understanding and Applying Assessment**

**in Education** Damian Murchan, Gerry Shiel, 2024-04-09 All teachers are responsible for assessing the children they teach and the outcomes of any assessment are important for individual learners, schools, and wider education systems. Designed as a pragmatic guide for new teachers and those training to teach, this book is your one-stop shop for understanding assessment in schools. It covers formative and summative approaches used across primary and secondary education, supporting a balanced overview with policy examples drawn from the UK, Ireland, and wider international contexts. This updated second edition reflects recent trends in assessment and includes more balanced coverage across primary and secondary age phases, with a broader range of examples across curriculum subject areas, a new chapter on the potential of digital assessment for both formative and summative purposes, the impact of the COVID-19 pandemic on assessment in general and examinations in particular. Damian Murchan is Associate Professor in the School of Education at Trinity College Dublin. Gerry Shiel is a Research Fellow at the Educational Research Centre, Dublin, Ireland. **Cognitive Activation in the Mathematics Classroom and Professional Competence of Teachers** Mareike Kunter, Jürgen Baumert, Werner Blum, Ute Klusmann, Stefan Krauss, Michael Neubrand, 2013-03-29 This work reports the findings of the Professional Competence of Teachers Cognitively Activating Instruction and Development of Students Mathematical Literacy project COACTIV. COACTIV applies a broad, innovative conceptualization of teacher competence to

examine how mathematics teachers knowledge beliefs motivational orientations and self regulation skills influence their instructional practice and teaching outcomes In this project data was collected on various aspects of teacher competence and classroom instruction from the perspective of both the teachers themselves and their students Moreover it gauges the effects of these teacher characteristics on student learning as indexed by the progress students in each class Questions addressed in the study which are reported in this volume include What are the characteristics of successful teaching What distinguishes teachers who succeed in their profession How can the quality of instruction be improved

**Visualisation and Epistemological Access to Mathematics Education in Southern Africa** Marc Schäfer,2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education

### **Identity and Symbolic**

**Interaction** Richard T. Serpe, Robin Stryker, Brian Powell, 2020-04-22 This book examines identity theory's centrality within social psychology and its foundations within structural symbolic interaction highlighting its links not only to other prominent sociological subfields but also to other theoretical perspectives within and beyond sociology The book provides a synthetic overview outlining the intellectual lineage of identity theory within structural symbolic interactionism and how the Indiana School of identity theory and research associated especially with Sheldon Stryker relates to other symbolic interactionist traditions within sociology It also analyses the latest developments in response to the push to integrate identity theory which initially focused on role identities with the study of personal group and social identities Further it discusses the relationship between identity theory and affect control theory providing a sense of the many substantive topics within sociology beyond social psychology for which the study of identity has important sometimes underappreciated implications The book concludes with a chapter summarizing the interrelated lessons learned while also reflecting on remaining key questions and challenges for the future development of identity theory
