

## Worksheet: Volcanic eruptions

**Learning area:** Planet Earth and beyond

**Theme:** The changing Earth

**Specific Aim 1:** Acquiring knowledge of natural sciences and understanding the damage done by volcanoes.

Activity Sheet

Mass extinctions on Earth may result from a number of causes such as asteroid and comet impacts, rapid climate change (which in turn could lead to sea level changes), sea oxygen level changes, reduced oxygen levels in the atmosphere, changes in the proportion of atmospheric gases such as carbon dioxide, or huge volcanic eruptions.

### How and why do volcanic eruptions occur?

In the Earth's centre is a solid core of hot iron and nickel. The hot core melts the rock around it in the outer core and mantle. Hot rock rises and cool rock sinks and convection currents form in the mantle. Where the hot, liquid rock spreads out under the crust it causes the crust to split apart, and lava pours out onto the Earth's surface. Volcanoes occur at the plate margins – where new crust is being formed and where old crust is being forced back down into the mantle, called 'subduction zones'.

Earth is made up of interlocking pieces of land called tectonic plates. As these tectonic plates move, they cause the continents to move. These movements can lead to earthquakes and volcanoes. In the case of volcanoes, extreme heat, creating bubbles of carbon dioxide gas and steam, expands the magma. The expanding gases push the magma into a vent, or opening of a volcano and up to the Earth's surface, causing an explosive volcanic eruption. Once the magma (which is basically molten rock) overflows or erupts out through the Earth's crust, it is called 'lava'.

Some of the larger volcanic eruptions which have occurred on Earth lasted many years, pouring out lava that piled up kilometres deep, killing everything it covered.

Volcanoes also release large amounts of gases into the atmosphere, changing the atmospheric gas balance, and emitting greenhouse gases, which in turn leads to climate change. Climate change then leads to environmental change.
