High-performance Techniques for Digit-serial Applications and LDPC Codes Söng-uk Kim,2002 **Selected Topics in Information and Coding Theory** Isaac Woungang,Sudip Misra,Subhas Chandra Misra,2010 The last few years have witnessed rapid advancements in information and coding theory research and applications This book provides a comprehensive guide to selected topics both ongoing and emerging in information and coding theory Consisting of contributions from well known and high profile researchers in their respective specialties topics that are covered include source coding channel capacity linear complexity code construction existence and analysis bounds on codes and designs space time coding LDPC codes and codes and cryptography All of the chapters are integrated in a manner that renders the book as a supplementary reference volume or textbook for use in both undergraduate and graduate courses on information and coding theory As such it will be a valuable text for students at both undergraduate and graduate levels as well as instructors researchers engineers and practitioners in these fields Supporting Powerpoint Slides are available upon request for all instructors who adopt this book as a course text **New Approaches to Characterization and Recognition of Faces** Peter Corcoran,2011-08-01 As a baby one of our earliest stimuli is that of human faces We rapidly learn to identify characterize and eventually distinguish those who are near and dear to us We accept face recognition later as an everyday ability We realize the complexity of the underlying problem only when we attempt to duplicate this skill in a computer vision system This book is arranged around a number of clustered themes covering different aspects of face recognition The first section presents an architecture for face recognition based on Hidden Markov Models it is followed by an article on coding methods The next section is devoted to 3D methods of face recognition and is followed by a section covering various aspects and techniques in video Next short section is devoted to the characterization and detection of features in faces Finally you

can find an article on the human perception of faces and how different neurological or psychological disorders can affect this
