Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

2012-2013 College Admissions Data Sourcebook West Edition, **Adaptive Collaborative Management in Forest Landscapes** Carol J. Pierce Colfer, Ravi Prabhu, Anne M. Larson, 2021-12-12 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond, utilising detailed studies of forest landscapes and communities. Many forest management proposals are based on top-down strategies such as the Million Tree Initiative's Forest Landscape Restoration (FLR) and REDD, often neglecting local communities. In the context of the climate crisis, it is imperative that local peoples and communities are an integral part of all decisions relating to resource management. Rather than being seen as beneficiaries or people to be safeguarded, they should be seen as full partners, and Adaptive Collaborative Management is an approach which prioritises the rights and roles of communities alongside the need to address the environmental crisis. The volume presents detailed case studies and real-life examples from across the globe, promoting and prioritising the voices of women and scholars and practitioners from the Global South who are often under-represented. Providing concrete examples of ways that a bottom-up approach can function to enhance development sustainably, via its practitioners and far beyond the locale in which they initially worked, this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasise local control, inclusiveness, and local creativity in management. This book will be of great interest to students, scholars, and practitioners working in the fields of conservation, forest management, community development, and natural resource management and development studies more broadly. The Open Access version of this book is available at www.taylorfrancis.com and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license.

The Grey Zone Mark Lattimer, Philippe Sands, 2018-07-26 The high civilian death toll in modern protracted conflicts such as those in Syria or Iraq indicate the limits of international law in offering protections to civilians at risk A recent

conference of states convened by the International Committee of the Red Cross referred to an institutional vacuum in the area of international humanitarian law implementation Yet both international humanitarian law and the law of human rights establish a series of rights intended to protect civilians But which law or laws apply in a particular situation and what are the obstacles to their implementation How can the law offer greater protections to civilians caught up in new methods of warfare such as drone strikes or targeted by new forms of military organisation such as transnational armed groups Can the implementation gap be filled by the growing use of human rights courts to remedy violations of the laws of armed conflict or are new instruments or mechanisms of civilian legal protection needed This volume brings together contributions from leading academic authorities and legal practitioners on the situation of civilians in the grey zone between human rights and the laws of war The chapters in Part 1 address key contested or boundary issues in defining the rights of civilians or non combatants in today s conflicts Those in Part 2 examine remedies and current mechanisms for redress both at the international and national level and those in Part 3 assess prospects for the development of new mechanisms for addressing violations As military intervention to protect civilians remains contested this volume looks at the potential for developing alternative approaches to the protection of civilians and their rights

Why States Recover Greg Mills,2014 State failure takes many forms Somalia offers one extreme A collapse of central authority as the outcome of a prolonged civil war where authority descends into competing factions warlords around the spoils of local commerce power and international aid At the other end of the scale is Malawi under President Bingu During his abbreviated second term in office the country s economy collapsed as a result of poor policies and personalised politics On the surface save the petrol queues it was stable underneath the polity was fractured and the economy broken Between these two extremes of state failure are all manner of examples This book uses field work based case studies of more than thirty countries incorporating interviews with a dozen leaders to disaggregate various state failures and identify instances of

recovery from Latin America Asia and Africa including Afghanistan Congo Sierra Leone Kosovo Somalia and Somaliland Venezuela and Zimbabwe while focusing on a key question How do countries recover and what roles are there for insiders and outsiders

Creativity and Captivity Uday Balasundaram, 2021-12-02 Ultimately what really does it mean to be creative How can we see ourselves as participating in the creativity of God for mission All people are creative Sadly however for many creativity is stifled and remains stunted due to several reasons social economic political cultural and even spiritual This study explores how ICMs indigenous cosmopolitan musicians negotiate their creativity amid the liminal spaces they occupy as they share in the creativity of God for mission through their music But what exactly does it mean to share in the creativity of God for mission Contrary to popular notion ICMs evidence that creativity is not merely innovation it is not a psychological metric for measuring human potential it is certainly not the icing on the cake reserved for a few so called creatives or artists Rather theological creativity is participation in the creatio Dei it is theologically prior to mission As a missiological framework creatio Dei is understood here in terms of creative being creative construction design and creative performance Hopefully this book can help clarify and expand our understanding of what it means to be truly creative and thereby with the help of the Creator put into practice

principles of theological creativity as we share in the creativity of God in the world with others

Sonic Pasts Mariana J López, 2024-12-30 *Sonic Pasts* explores the fields of acoustical heritage and historical soundscapes through an interdisciplinary perspective. Reflecting on different methods of research and dissemination, it critiques biases related to race, ethnicity, gender, socioeconomics, and disability that are intrinsic to these fields. Academically rigorous while also deeply personal, *Sonic Pasts* introduces readers to how various disciplines have studied the sounds of the past, the connection those studies have to heritage more widely, including the concept of Intangible Cultural Heritage (ICH), and how sound is represented within UNESCO heritage listings. It offers a novel theoretical and practical framework on different approaches to the design of sound installations and online experiences on the topic, including the ethical challenges presented by different techniques. This book is essential reading for students and researchers considering sounds of the past as well as sound and heritage practitioners seeking to reflect on their current or future practices.

Business and Conflict in Fragile States Brian Ganson, Achim Wennmann, 2018-10-25 Large scale investments in fragile states in Latin America, Africa, the former Soviet Union, and Asia become magnets for conflict which undermines business development and security. International policy responds with regulation, state building, and institutional reform with poor and often perverse results. Caught up in old ways of thinking about conflict and fragility and an age old fight over whether multinational corporations are good or bad for peaceful development, it leaves business related conflicts in fragile states to multiply and fester. Surveying a new strategic landscape of business and conflict, Brian Ganson and Achim Wennmann conclude that neither company shareholders nor advocates for peaceful development need or should accept the growing cost of business related conflict in fragile states. Drawing on decades of experience from mainstream conflict prevention and violence reduction efforts, as well as promising company practice, they show that even acute conflict is manageable when dealt with pragmatically, locally, and on its own terms. The analysis and conclusions of this Adelphi book will interest policymakers, business leaders, and community advocates alike, all those hoping to mitigate today's conflicts while helping to reduce fragility and build a firmer foundation for inclusive development.

The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past, present, and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge, production, the global economy, global security, and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike previous handbooks, this book offers an eclectic mix of historical, contemporary, and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world.

The SAGE Handbook of Contemporary China Weiping Wu, Mark Frazier, 2018-07-09 The study of contemporary China

constitutes a fascinating yet challenging area of scholarly inquiry. Recent decades have brought dramatic changes to China's economy, society, and governance. Analyzing such changes in the context of multiple disciplinary perspectives offers opportunities as well as challenges for scholars in the field, known as contemporary China studies. The SAGE Handbook of Contemporary China is a two-volume exploration of the transformations of contemporary China, firmly grounded in both disciplinary and China-specific contexts. Drawing on a range of scholarly approaches found in the social sciences and history, an international team of contributors engage with the question of what a rapidly changing China means for the broader field of contemporary China studies and identify areas of promising future research.
